

# **2025 2nd International Conference on Artificial Intelligence for Innovations in Healthcare Industries (ICAIHI 2025)**

**Raipur, India  
4-5 December 2025**

**Pages 1–672**

IEEE Catalog Number: CFP25GZ2-POD  
ISBN: 979-8-3315-8268-5

# TABLE OF CONTENTS

|                                                                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Prediction of personality for mental health detection using hybrid machine learning approach .....                                                                            | 1  |
| <i>Md Khadimul Islam Zim, Md Abu Hanif, Arun Singh, Jatinder Kaur</i>                                                                                                         |    |
| CT Scan-Based COVID-19 Detection Using Feature Extraction and Stack-Based Ensemble Techniques .....                                                                           | 7  |
| <i>Yekkanti Lakshmi, Sourav Mondal, Debnarayan Khatua, Pathan Nayeem Khan, Harendra Kumar Gorla Siva Rama Krishna</i>                                                         |    |
| An Explainable Artificial Intelligence Approach to Health Insurance Claim Fraud Detection .....                                                                               | 13 |
| <i>Janapati Malathi, Talari Srinivasa Rao, Myneedi Chetan Viswa Kumar, Shaik Mujahid</i>                                                                                      |    |
| Machine Learning Framework for Early Detection of Glucose Metabolism Disorder Using XGBoost and LightGBM .....                                                                | 19 |
| <i>Deepak Singla, Shipra Goel, Deepali Gupta, Anto Lourdu Xavier Raj Arockia Selvarathinam B. Persis Urbana Ivy, Reshma R</i>                                                 |    |
| A Deep learning-based Volumetric Segmentation with Transformer-based 3D Deeplab V3+ Framework for 3D Brain Image Analysis .....                                               | 25 |
| <i>Tuniki Krishnaveni, Sreedhar Kollem</i>                                                                                                                                    |    |
| A Comprehensive Review of Explainable Machine Learning and Deep Learning Approaches to Early Diagnosis of Parkinson's Disease .....                                           | 31 |
| <i>Prabhjot Kaur, Richa Sharma, Saurabh Sharma</i>                                                                                                                            |    |
| SHAP-Enhanced Random Forest Model for Diabetes Prediction .....                                                                                                               | 37 |
| <i>Vatanpreet Kaur, Jaspreet Singh Batth, Meena Pundir</i>                                                                                                                    |    |
| Transparent XAI Solutions for Better Healthcare with a Multilingual Chatbot .....                                                                                             | 44 |
| <i>Suvarna Patil, Gajanan Gambhire, Mrunmayi Pidadi, Saniya Nirmale, Pratik Pawar, Yashraj Ranmode Nupoor Raut</i>                                                            |    |
| OCULTICS: A Machine and Deep Learning Framework For Predictive Diagnosis Of Critical Eye Diseases .....                                                                       | 50 |
| <i>G Dharani Devi, S Harivarsan, J Mervin</i>                                                                                                                                 |    |
| Stabilizing Epidemic Surveillance: A Scalable Framework for Real-Time Correction of Incomplete Public Health Data .....                                                       | 55 |
| <i>Swapnesh Tiwari</i>                                                                                                                                                        |    |
| A Hybrid Deep Learning and Machine Learning Framework for Automated Classification of Leukemia Using Decision Tree, Random Forest, SVM and XG Boost .....                     | 60 |
| <i>Deepak Rao Khadatkhar, Ayush Sah, Ashish Gupta, Chirag Kashyap</i>                                                                                                         |    |
| Pariwar+: AI-Driven Family Health Tracker using Ensemble Learning and NLP Techniques .....                                                                                    | 65 |
| <i>Jyoti Wadmare, Mahek Raigagla, Muskaan Popat, Manusri Saliyan, Bhumi Shah</i>                                                                                              |    |
| A neuro-engineering-based pilot study on Repetitive Transcranial Magnetic Stimulation (rTMS) and parent-mediated behavioural training (PBT) in autism spectrum disorder ..... | 71 |
| <i>Neha Krishnakumar Yadav, Sharath Hullumani, Irshad Qureshi</i>                                                                                                             |    |
| Evaluating Hospital Supply Chain Performance Using AI-Driven Predictive Forecasting: An Analysis of Inventory Management and Crisis Response .....                            | 75 |
| <i>Manu R Dixit, Sandeep Kumar Shivhare</i>                                                                                                                                   |    |

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Automated Brain Stroke Detection In Ct Images Using Hyper Vision Transformer (Hvt) Architecture .....                                                                  | 81  |
| <i>M. Kavitha Margret, Rithesh B, RithishKumar N, Sabees Joshua A</i>                                                                                                  |     |
| Quantitative Analysis of CNN models for Identifying OSCC .....                                                                                                         | 87  |
| <i>Puneet Misra, Ayushi Chaurasia</i>                                                                                                                                  |     |
| Gender Disparities in Household Dynamics and Health Outcomes: A Bayesian Hierarchical Analysis .....                                                                   | 91  |
| <i>Swapnesh Tiwari</i>                                                                                                                                                 |     |
| A Comparative Study Of Diabetes Risk Prediction Model Using Machine Learning .....                                                                                     | 97  |
| <i>Toshniwali Bhargav, Julee Prajapat, Shivangi Tiwari, Zeya Hashmi</i>                                                                                                |     |
| CNN and Transfer Learning Model For Breast Cancer Prediction .....                                                                                                     | 103 |
| <i>Adilbek Rajapov, Inoyatillo Kholmurodov, Niginabonu Khajiqurbonova, Mukhayya Djumaniyazova</i><br><i>Zulkhumor Jumaniyazova, Chitra Murugan, B.Venkataramanaiah</i> |     |
| Adaptive DDSS for Clinical Workflow Integration and Predictive Analytics .....                                                                                         | 107 |
| <i>Kulvinder Singh, Pawandeep Singh, Akhil Rai, Sukhneet Kaur, Anoop Kumar</i>                                                                                         |     |
| BioDL-BreastNet: A Bio-Inspired Deep Learning Framework for Breast Cancer Diagnosis and Risk Stratification .....                                                      | 114 |
| <i>Kranti Kumar Dewangan, Jyoti Singh</i>                                                                                                                              |     |
| High-Performance BiLSTM-CNN Framework for Cardiovascular Disease Prediction with Enhanced Class Imbalance Handling .....                                               | 120 |
| <i>Ashish Kumbhare, K.P. Yadav</i>                                                                                                                                     |     |
| Decoding Hallucinations: Corollary Discharge and Predictive Processing in Schizophrenia Using EEG and Machine Learning .....                                           | 126 |
| <i>Sujata Negi Thakur, Asima Akter Chohwdhury, Amarjeet, Anurag Sinha, Saroj Kumar Pandey</i><br><i>Anurag Pandey</i>                                                  |     |
| A Pilot Study on Evaluation of AI-Integrated OPEP Device and RC Cornet PLUS for Enhanced Chest Physiotherapy in Pneumonia .....                                        | 132 |
| <i>Sakshi Shankarrao Waghmare, Sharath Hullumani, Vishnu Vardhan</i>                                                                                                   |     |
| Enhanced Explainable Diagnosis of Alzheimer's Disease .....                                                                                                            | 138 |
| <i>Prasad kolhapure, Shravani Wadikar, Giridhar Hebbale</i>                                                                                                            |     |
| Intelligent Heart Disease Detection Using Deep Neural Networks .....                                                                                                   | 144 |
| <i>Prasad kolhapure, Shravani Wadikar, Giridhar Hebbale</i>                                                                                                            |     |
| A Review on Detection of non-invasive Oral Cancer based on Deep Learning Techniques, Challenges and Future Directions .....                                            | 151 |
| <i>Pankaj Shantilal Shinde, Saroj Kumar Pandey, Manoj Kumar Ojha</i>                                                                                                   |     |
| Epileptic seizure detection using Light-weight Deep Convolutional Neural Network model from EEG signals .....                                                          | 157 |
| <i>Khairnar Dipali Bharat, Saroj Kumar Pandey, Manoj Kumar Ojha</i>                                                                                                    |     |
| Leveraging ML Algorithms for Early Diagnosis of Parkinson's Disease from Voice Patterns .....                                                                          | 162 |
| <i>Lokesh Singh, Saroj Kumar Pandey, Sandeep Kumar Agrawal, Priya Jain, Deepti Sisodia</i>                                                                             |     |

|                                                                                                                                                                                                          |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Review on Classification of Lymph Nodes in benign, and malignant classes using Deep Learning Techniques .....                                                                                          | 167 |
