# TABLE OF CONTENTS

|                                                                                                                                                                                   |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Multi-Energy Load Forecasting for Integrated Energy Systems Based on Mamba-Graph Convolutional Networks .....                                                                     | 1  |
| <i>Yu Jiang, Xuncheng Zhang, Yongqi Yan, Yudie Sun, Xinyang Wang, Yuyang Ji</i>                                                                                                   |    |
| Forecast and Application of Industrial Power Load Based on MACD Algorithm .....                                                                                                   | 7  |
| <i>Jian Zhang, Ye Zhang, Qingchun Li, Zhanwen Feng, Shiyi Zhao, Nannan Xia, Xuan Hui</i>                                                                                          |    |
| Study on Load Reduction Effect and Influencing Factors of Centralized Maintenance Based on Linear Mixed-Effects Model : A Case Study of Sichuan Province's Practice in 2025 ..... | 13 |
| <i>Wentao Chang, Kaiji Liao, Xiaojun Li, Chen Liu, Haoyuan Ma, Xiang Zhang</i>                                                                                                    |    |
| Industrial Power Load and Electricity-Carbon Classification Based on Improved VMD-DBN Algorithm .....                                                                             | 24 |
| <i>Ye Zhang, Qingchun Li, Jian Zhang, Jian Li, Bo Dong, Nan Liu</i>                                                                                                               |    |
| Analysis of Load Forecasting Improvement in Fujian Region Considering Wide-Area Distributed Photovoltaics .....                                                                   | 30 |
| <i>Qingliang Wang, Ye Han, Guanghui Hua, Chaohui Zhou, Xin Li, Chang Zhou</i>                                                                                                     |    |
| A Simplified Auxiliary Circuit Structure PRDCLSI and Its Synchronous Modulation Strategy .....                                                                                    | 36 |
| <i>Si Li, Yilong Wang, Chuang Wang, Dongsheng Yang</i>                                                                                                                            |    |
| Hybrid Game Intelligent Control for Large-Scale Electric Vehicle and Power Grids Cooperation .....                                                                                | 42 |
| <i>Hengyu Liu, Jiahan Wang, Shuangde Liu, Chongrui Ji, Dawei Hu, Minzhe Wang</i>                                                                                                  |    |
| A Device for Mitigating Three-Phase Load Unbalance via Inter-Phase Power Sharing .....                                                                                            | 49 |
| <i>Ling Zaixun, Wu Xiaomin, Cui Yibo, Fang Zhijian, Zhao Yunfei, Wang Mengxing</i>                                                                                                |    |
| Design of an LDO Linear Regulator Based on Bipolar Technology .....                                                                                                               | 55 |
| <i>Renjie Huang, Yifei Zhao, Bo Gao, Sijie Zhang</i>                                                                                                                              |    |
| Axial Vibration Model Accounting for Cumulative Effects .....                                                                                                                     | 60 |
| <i>Guangwei Liu, Zhen Hao, Zhaoyang Pan, Huan Li, Deliang Cheng, Fan Zhang, Guodong Hu</i>                                                                                        |    |
| Modeling and Design of A Multiphase DC-DC Buck Converters .....                                                                                                                   | 66 |
| <i>Yueru Li, Yifei Zhao, Nanjia Li, Bo Gao</i>                                                                                                                                    |    |
| Research on Control Strategies for Grid-Forming Inverters Based on Flywheel-Photovoltaic Hybrid Energy Storage Systems .....                                                      | 71 |
| <i>Guangyu Sun, Xiaotong Zhang, Bing Xie, Chenyi Wang</i>                                                                                                                         |    |
| A Bi-Level Game-Theoretic Approach for Energy-Aware Coordinated Dispatch in Industrial Plant Clusters .....                                                                       | 84 |
| <i>Rui Guo, Taiyu Gu, Ye Tian, Zilun Shen, Xincheng Guo</i>                                                                                                                       |    |
| Analysis of the Interactive Effects Between Optimal Configuration of Large-Scale Renewable Energy Bases and Power Transmission Prices .....                                       | 90 |
| <i>Wei Cui, Tongxi Wu, Wei Wang, Yuanzheng Cao, Cong Wang</i>                                                                                                                     |    |
| Parameter Identification for Dynamic Coupling Frequency Modulation of Adjustable Resources Based on Fractional-Order Particle Swarm Optimization Algorithm .....                  | 98 |
| <i>Xiaotong Zhang, Junjie Sun, Yangyang Ge, Xintong Ma, Bing Xie, Shubo Hu</i>                                                                                                    |    |

|                                                                                                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Multi-Dimensional Feature Fusion-Based Intelligent Early Warning System for Internal Topological Faults in Electric Energy Meters ..... | 104 |
| <i>Kaiji Liao, Wentao Chang, Ruichao Li, Xiaojun Li, Jie Shen</i>                                                                       |     |
| Sensitivity Analysis and Intelligent Optimization Collaborative Photovoltaic Power Generation Parameter Identification Method .....     | 108 |
| <i>Xutao Li, Yong Ren, Lei Zhou, Hongqiang Li</i>                                                                                       |     |
| Optimal Scheduling of Flexible Distribution Networks Based on Deep Reinforcement Learning Considering Soft Normally Open Points .....   | 121 |
| <i>Peng Wu, Zhaohe Yu, Tianyu Li, Kaiyuan Ji, Yini Zhang, Wenhao Yang, Pengfei Xie</i>                                                  |     |
| A Method for Multi-Scenario Experimental Verification of Automatic Control Software in Power Dispatching Automation Systems .....       | 127 |
| <i>Huiguang Xu, Jiangfeng Qian, Siyuan Zhang, Fang Li, Changjun Zhou, Chen Wang</i>                                                     |     |
| Quantitative Pre-Evaluation Method of Dynamic Coupled frequency Modulation Capability Based on K-Cell CFAR Algorithm .....              | 135 |
| <i>Xiaotong Zhang, Yangyang Ge, Shubo Hu, Bing Xie, Xintong Ma, Ping Li</i>                                                             |     |
| An Anomaly Detection Model for Power Data Based on Dynamic Spatiotemporal Modeling .....                                                | 141 |
| <i>Bingqin Wang, Xinping Wu, Xinzhou Geng, Qiuzhe Ma, Ao Xiong</i>                                                                      |     |
| Complex Regional Power Grid Voltage and Reactive Power Automatic Control Technology Based on Edge Computing .....                       | 152 |
| <i>Yifan Yang, Bin Zhao, Yi Li, Jia Wang, Hancong Ma, Zhenyu Liu</i>                                                                    |     |
| Estimation analysis and robust identification of photovoltaic model parameters for local shading conditions .....                       | 157 |
| <i>Yong Ren, Lei Zhou, Shuang Zhang, Xutao Li</i>                                                                                       |     |
| Distribution Network Operation Voltage Optimization of Distributed Systems Based on Improved PSO Algorithm .....                        | 166 |
| <i>Yi Li, Bin Zhao, Jia Wang, Zhuang Zhang, Hancong Ma, Zhongxiang Yan</i>                                                              |     |
