# TABLE OF CONTENTS

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| Contactless Fingerprint Recognition Guided by 3D Finger Pose .....                                            | 1   |
| <i>Haoxiang Pei, Zhiyu Pan, Xiongjun Guan, Jianjiang Feng, Jie Zhou</i>                                       |     |
| AG-VPReID.VIR: Bridging Aerial and Ground Platforms for Video-based Visible-Infrared Person Re-ID .....       | 10  |
| <i>Huy Nguyen, Kien Nguyen, Akila Pemasiri, Akmal Jahan, Clinton Fookes, Sridha Sridharan</i>                 |     |
| LAMAR: LLM-Guided Adaptive Perceptual Modeling for Micro-Action Recognition .....                             | 20  |
| <i>Yiwei Ru, Leyuan Wang, Ma He, Zhaofeng He, Zhenan Sun</i>                                                  |     |
| LMBR-Net: A Lightweight Multimodal Biometric Recognition Network via Joint Progressive Dynamic Sparsity ..... | 29  |
| <i>Jun Wang, Jie Hu, Xiao Yang, Penghao Jin, Zaiyu Pan</i>                                                    |     |
| Mind the Gap: Bridging Occlusion in Gait Recognition via Residual Gap Correction .....                        | 38  |
| <i>Ayush Gupta, Siyuan Huang, Rama Chellappa</i>                                                              |     |
| M3DHMR: Monocular 3D Hand Mesh Recovery .....                                                                 | 48  |
| <i>Yihong Lin, Xianjia Wu, Xilai Wang, Jianqiao Hu, Songju Lei, Xiandong Li, Wenxiong Kang</i>                |     |
| CGTGait: Collaborative Graph and Transformer for Gait Emotion Recognition .....                               | 57  |
| <i>Junjie Zhou, Haijun Xiong, Junhao Lu, Ziyu Lin, Bin Feng</i>                                               |     |
| Swin Transformer-Based Temporal-Channel Network for Cross-Subject EEG Emotion Classification .....            | 68  |
| <i>Ruijie He, Xin Wen, Yanrong Hao, Mengni Zhou, Jin Li, Rui Cao</i>                                          |     |
| Multi-Attribute guided Thermal Face Image Translation based on Latent Diffusion Model .....                   | 78  |
| <i>Mingshu Cai, Osamu Yoshie, Yuya Ieiri</i>                                                                  |     |
| StreamWMR: A Streaming Framework for Real-time 3D Whole-body Mesh Recovery .....                              | 87  |
| <i>Miao Xu, Xiangyu Zhu, Jinlin Wu, Zidu Wang, Xiaomei Zhang, Li Gao, Shukai Chen, Dong Yi, Zhen Lei</i>      |     |
| Spoof Trace Discovery for Deep Learning Based Explainable Face Anti-Spoofing .....                            | 97  |
| <i>Haoyuan Zhang, Xiangyu Zhu, Li Gao, Jiawei Pan, Kai Pang, Guoying Zhao, Zhen Lei</i>                       |     |
| QGait: Toward Accurate Quantization for Gait Recognition .....                                                | 107 |
| <i>Senmao Tian, Haoyu Gao, Gangyi Hong, Shuyun Wang, JingJie Wang, Xin Yu, Shunli Zhang</i>                   |     |
| GenFIQA: Generative Face Image Quality Assessment via Identity-conditioned Diffusion Model .....              | 117 |
| <i>Zheyu Yan, Weisong Zhao, Li Gao, Kai Pang, Xiangyu Zhu, Xiao-Yu Zhang, Zhen Lei</i>                        |     |
| DiffSpeaker: Speech-Driven 3D Facial Animation with Diffusion Transformer .....                               | 127 |
| <i>Zhiyuan Ma, Xiangyu Zhu, Chen Qian, Shukai Chen, Li Gao, Guojun Qi, Zhaoxiang Zhang, Zhen Lei</i>          |     |
| SecureSpeech: Prompt-based Speaker and Content Protection .....                                               | 137 |
| <i>Belinda Soh Hui Hui, Xiaoxiao Miao, Xin Wang</i>                                                           |     |
| Pore-DMNet: Joint Pore Descriptor and Metric Learning for High-Resolution Fingerprint Recognition .....       | 145 |
| <i>Shuqi Li, Haixia Wang, Zilan Pan, Yilong Zhang, Haohao Sun</i>                                             |     |
| Facial Demorphing from a Single Morph Using a Latent Conditional GAN .....                                    | 154 |
| <i>Nitish Shukla, Arun Ross</i>                                                                               |     |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Growing to Detect: A Dynamic Prototype Tree with Structured Replay for Incremental Deepfake Detection .....                                 | 165 |
| <i>Siyu Liu, Junxian Duan, Jie Cao, Aihua Zheng, Ran He</i>                                                                                 |     |
| CLFE-GAN: A Generation Framework for Contactless Fingerprint Enhancement .....                                                              | 174 |
| <i>Yin Li, Feng Liu</i>                                                                                                                     |     |
| An Adaptive Dynamic Feature Selection Framework with CNN-Vision Transformer Hybrid Architecture for Continuous Joint Angle Estimation ..... | 183 |
| <i>Kejia Su, Hanbing Qiao, Bo Wan, Kai Liu, Changhua Jiang, Fei Wang</i>                                                                    |     |
| A Mutual Distillation Learning Framework for Multimodal Biometric Recognition with Uncertain Missing Modality .....                         | 192 |
| <i>Yan Gu, Shuangtian Jiang, Hai Yuan, Jun Wang, Zaiyu Pan</i>                                                                              |     |
| Learning Interpersonal Similarities in Multiple Fingers via Fingerprint Landmark-Aware Recognition Network .....                            | 202 |
| <i>Jiwon Kim, Youjin Shin, Simon S. Woo</i>                                                                                                 |     |
| Explaining Convolutional Neural Networks via a Concise and Hierarchical Approach .....                                                      | 211 |
| <i>Jiawei Pan, Xiangyu Zhu, Haoyuan Zhang, Stan Z. Li, Zhen Lei</i>                                                                         |     |
| Fair GANs through model rebalancing for extremely imbalanced class distributions .....                                                      | 221 |
| <i>Anubhav Jain, Nasir Memon, Julian Togelius</i>                                                                                           |     |
| xEdgeFace: Efficient Cross-Spectral Face Recognition for Edge Devices .....                                                                 | 231 |
| <i>Anjith George, Sébastien Marcel</i>                                                                                                      |     |
| Towards Zero-Shot ISO/ICA0 Face Compliance Verification via CLIP-IQA and Natural Language Prompting .....                                   | 242 |
| <i>Nicolò Di Domenico, Guido Borghi, Annalisa Franco, Davide Maltoni</i>                                                                    |     |
| Warp Gait Across Ages: Cross-age Gait Video Translation with Part-aware Flow Warping .....                                                  | 251 |
| <i>Yiyi Zhang, Hanchong Yan, Liqing Zhang, Yasushi Yagi</i>                                                                                 |     |
| Collaborative Spatial and Channel Attention for Structural Vibration-based Gait Recognition .....                                           | 261 |
| <i>Junhao Lu, Haijun Xiong, Junjie Zhou, Ziyu Lin, Bin Feng</i>                                                                             |     |
| Exploiting Facial Discomfort Clues with Vision-Language Model for Generalizable Face Forgery Detection .....                                | 272 |
| <i>Tianshuo Zhang, Xiangyu Zhu, Li Gao, Kai Pang, Shukai Chen, Zhen Lei</i>                                                                 |     |
| SSSL-HAR: Synthetic-Data-Driven Self-Supervised Learning for flexible IMU-Based Human Activity Recognition .....                            | 282 |
| <i>Timin Li, Zhuangzhuang Li, Dongmei Li, Ji Wu, Yuepeng Chen, Xuefeng Feng, Ye Ma, Dongwei Liu, Chenyi Guo</i>                             |     |
| Debias-DPO: Debiasing Diffusion-based Face Image Generation with Direct Preference Optimization .....                                       | 292 |
| <i>Malsha V. Perera, Vishal M. Patel</i>                                                                                                    |     |
| Bias Analysis for Synthetic Face Detection: A Case Study of the Impact of Facial Attributes .....                                           | 302 |
| <i>Asmae Lamsaf, Lucia Cascone, Hugo Proença, João Neves</i>                                                                                |     |
| BiommmWave: A Non-Visual Approach for Biometric Recognition Using Millimeter-Wave Radar .....                                               | 312 |
| <i>Mupei Li, Yunlong Wang, Yiwei Ru, Kunbo Zhang, Zhenan Sun</i>                                                                            |     |

|                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| CURE: Centroid-guided Unsupervised Representation Erasure for Facial Recognition Systems .....                                                 | 322 |
| <i>Fnu Shivam, Nima Najafzadeh, Yenumula Reddy, Prashnna Gyawali</i>                                                                           |     |
| Towards Robust and Efficient Continuous Face Authentication via Disentangled Representation<br>Learning and Adaptive Identity Completion ..... | 332 |
| <i>Xiang Li, Chi Xu, Yasushi Yagi</i>                                                                                                          |     |
| A Responsible Face Recognition Approach for Small and Mid-Scale Systems Through Personalized<br>Neural Networks .....                          | 342 |
| <i>Sebastian Groß, Stefan Heindorf, Philipp Terhörst</i>                                                                                       |     |
| Spatial Continuity-Aware OCT Fingerprint Reconstruction Using Iterative Feature Enhancement .....                                              | 352 |
| <i>Yilong Zhang, Xuanbing Chen, Shengming Zhu, Haohao Sun, Haixia Wang, Jian Liu, Yuanjie Dang<br/>Ronghua Liang, Peng Chen</i>                |     |
| Closing the Performance Gap in Biometric Cryptosystems: A Deeper Analysis on Unlinkable Fuzzy<br>Vaults .....                                  | 361 |
| <i>Hans Geißner, Christian Rathgeb</i>                                                                                                         |     |
| Rethinking Early-Fusion Strategy for Palmprint and Palm Vein Fusion Recognition .....                                                          | 371 |
| <i>Yi Yu, Penghao Jin, Jun Wang, Zaiyu Pan</i>                                                                                                 |     |
| Improving Contactless Fingerprint Recognition with Robust 3D Feature Extraction and Graph<br>Embedding .....                                   | 379 |
