# TABLE OF CONTENTS

|                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------|-----|
| Knowledge-guided Continual Learning for Behavioral Analytics Systems .....                                             | 1   |
| <i>Yasas Senarath, Hemant Purohit</i>                                                                                  |     |
| An Iterative Multi-Agent Analysis for Automated Evaluation in NLG Tasks .....                                          | 12  |
| <i>Hadel Alhawasi, Ruocheng Shan, Abdou Youssef</i>                                                                    |     |
| Next-Gen Theorem Proving: A Multi-Agent Paradigm for Automated Reasoning .....                                         | 24  |
| <i>Akhil Gupta Chigullapally, Ram Dantu, Shakila Zaman, Apurba Pokharel</i>                                            |     |
| Assessing LLM Reasoning with Subtask Variation: Chess and DREAMS .....                                                 | 35  |
| <i>Carlos Olea, Allen Karns, Jules White</i>                                                                           |     |
| Object Empowerment-Driven Tool Selection in Reinforcement Learning .....                                               | 43  |
| <i>Faizan Rasheed, Daniel Polani, Kenzo Clauw, Nicola Catenacci Volpi</i>                                              |     |
| Online Decision Mamba .....                                                                                            | 53  |
| <i>Trenton W. Ruf, Banafsheh Rekabdar</i>                                                                              |     |
| Evaluating Human and Machine Confidence in Phishing Email Detection: A Comparative Study .....                         | 66  |
| <i>Paras Jain, Khushi Dhar, Olyemi E. Amujo, Esa M. Rantanen</i>                                                       |     |
| Restricted Hopfield Networks are Resilient to Adversarial Perturbations .....                                          | 75  |
| <i>Ci Lin, Tet Yeap, Iluju Kiringa, Biwei Zhang</i>                                                                    |     |
| Edge-Optimized Privacy: Synthetic Data Generation Using Hybrid SMOTE & Autoencoder .....                               | 86  |
| <i>Kiana Katouzian, Ahmad Patooghy</i>                                                                                 |     |
| RL-MoE: An Image-Based Privacy Preserving Approach In Intelligent Transportation System .....                          | 93  |
| <i>Abdolazim Rezaei, Mehdi Sookhak, Mahboobeh Haghparsat</i>                                                           |     |
| Deep Metric Stylometry: Learning Author Signatures from Style and Semantics .....                                      | 103 |
| <i>Mostafa Rahgouy, Mehnaz Tabassum, Dongji Feng, Gerry Dozier, Cheryl D. Seals</i>                                    |     |
| AI for Supporting Dispatchers' Mental Health: Proof-of-Concept for Stress Detection Based on<br>Emotional State .....  | 114 |
| <i>Christin Salley, Daehwan Yoo, Michelle Chatell, Sabine Loos, Stacey Hall, Lu Wang</i>                               |     |
| Dynamic Stress Detection: A Study of Temporal Progression Modelling of Stress in Speech .....                          | 127 |
| <i>Vishakha Lall, Yisi Liu</i>                                                                                         |     |
| Self-Supervised MRI Representation Learning for Cross-Domain Brain Diseases Classification .....                       | 134 |
| <i>Rishab Darshan Shylendra, Pavithran Gnanasekaran, Piyush Gulhane, Alina Vereshchaka</i>                             |     |
| ELM: Leveraging Large Language Models for Reliable Emotion Recognition .....                                           | 145 |
| <i>Richard Feng</i>                                                                                                    |     |
| Transfer Learning based Cognitive Load Monitoring from Cognitive Motor Integration (CMI): An<br>ML-IoT Framework ..... | 155 |
| <i>Mahima Chaudhary, Sumona Mukhopadhyay, Meaghan S. Adams, Lauren E. Sergio, Marin Litoiu</i>                         |     |
| Dependence Minimization for Multi-Label Classification: An Alternative to Human Labeling .....                         | 165 |
| <i>Alex Metzger, Ram Dantu, Alexis Blackwell, Thomas McCullough</i>                                                    |     |

|                                                                                                                                                 |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| SentiGAT: Enhancing Multimodal Sentiment Analysis via Graph Attention Network-Based Feature Fusion and Alignment .....                          | 176 |
| <i>Misbah Ul Hoque, Kisung Lee</i>                                                                                                              |     |
| Cross-Country Analysis of Discourse on Misinformation in the Digital Platform Using Topic Modeling .....                                        | 187 |
| <i>Kuheli Sai, Minh Nguyen, Deepti Gupta, Quang Thinh-Bui</i>                                                                                   |     |
| Cognitive Data Architecture for Financial Services: A Benchmark-Driven Framework for Real-Time, AI-Enabled Compliance and Risk Management ..... | 197 |
| <i>Bharat Chaturvedi</i>                                                                                                                        |     |
| Towards Multimodal Solar Flare Prediction Using Magnetic Polarity Inversion Lines .....                                                         | 205 |
| <i>Ziba Khani, Reza Mansouri, Berkay Aydin</i>                                                                                                  |     |
| Explaining at the Speed of Sight: Attention-Aware XAI for OODA-Inspired AI Design .....                                                         | 213 |
| <i>Dylan Wright, Vineetha Menon</i>                                                                                                             |     |
| MEAT: Mixture of Experts in Action Transformer for Robotic Arm Control .....                                                                    | 223 |
| <i>Naeem Ul Islam, Hung Phan Quoc Mai, Ying-Jen Chen</i>                                                                                        |     |
| Dynamic Reward Scaling for Multivariate Time Series Anomaly Detection: A VAE-Enhanced Reinforcement Learning Approach .....                     | 235 |
| <i>Bahareh Golchin, Banafsheh Rekabdar</i>                                                                                                      |     |
| Enabling Lifelong Learning in AI with Biologically-inspired Neural Networks Based on Short-Term, Working, and Long-Term Memory* .....           | 244 |
| <i>Hanav Modasiya</i>                                                                                                                           |     |
| Emergent Biases in Large Language Models: A Critical Review of Taxonomy and Evaluations .....                                                   | 253 |
| <i>Shawn Ismail, Ramazan Aygun</i>                                                                                                              |     |
| Quantum Clustering for Cognitive Intelligence: Methods, Applications and Challenges .....                                                       | 263 |
| <i>Ahmad Alomari, Sathish A. P. Kumar</i>                                                                                                       |     |
| Robust and Efficient Traffic Monitoring System Under Adverse Weather .....                                                                      | 272 |
| <i>Ramy Othman, Anisha Mulinti, William O'Donnell, Weitian Wang, Michelle Zhu</i>                                                               |     |
| Prompts and Thoughts: Can Your Cyber Curriculum Meet the Job Skills .....                                                                       | 281 |
| <i>Alexis Blackwell, Ram Dantu, Alex Metzger, Vinh Quach</i>                                                                                    |     |
| Effect of Anxiety Reduction Interventions on Exam Anxiety for Engineering Students Using Physiological Signals .....                            | 292 |
| <i>Jyotiska Bharadwaj, Ayushi Dey, Aditya Bibhas Sahu, Karan Maheshwari, Sanat, Divyashikha Sethia, Sonia Baloni Ray</i>                        |     |
| Where to Explore: A Reach and Cost-Aware Approach for Unbiased Data Collection in Recommender Systems .....                                     | 302 |
| <i>Qiang Chen, Venkatesh Ganapati Hegde</i>                                                                                                     |     |
| Hybrid Classical-Quantum Neural Network for Distributed Denial of Service Attacks Detection .....                                               | 309 |
| <i>Ahmad Alomari, Sathish A. P. Kumar</i>                                                                                                       |     |
| MORAL: A Multimodal Reinforcement Learning Framework for Cognitive Intelligence in Autonomous Laboratories .....                                | 317 |
| <i>Natalie Tirabassi, Sathish A. P. Kumar, Sumit Jha, Arvind Ramanathan</i>                                                                     |     |

|                                                                                                                         |     |
|-------------------------------------------------------------------------------------------------------------------------|-----|
| Preventing Data Poisoning in Continual Learning for AI Generated Text Detectors .....                                   | 326 |
| <i>Ian Miller, Dan Lin</i>                                                                                              |     |
| The Imitation Fallacy: Why Behavioral Equivalence Cannot Verify Artificial Consciousness .....                          | 335 |
| <i>Aayush Gauba</i>                                                                                                     |     |
| Human-in-the-Loop Runbook Improvement with Agentic Support Automation .....                                             | 341 |
| <i>Rocker D’Antonio, Harry Xie</i>                                                                                      |     |
| Quantum Regression for Cognitive Intelligence in Complex Environments .....                                             | 352 |
| <i>Ahmad Alomari, Sathish A. P. Kumar</i>                                                                               |     |
| FedHFT: Efficient Federated Fine-tuning with Heterogeneous Edge Clients .....                                           | 361 |
| <i>Fatih Ilhan, Selim Furkan Tekin, Tiansheng Huang, Gaowen Liu, Ramana Kompella, Greg Eisenhower</i>                   |     |
