|                                                                                                                                       |           |
|---------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Three-Dimensional Numerical Modelling of Residual Stresses Induced in Surface Milling.....</b>                                     | <b>1</b>  |
| <i>J. Rech<sup>1</sup>, F. Vailiorgue<sup>1</sup>, S. Han<sup>1</sup>, L. Polly, M. Raffestin<sup>2</sup></i>                         |           |
| 1. <i>University of Lyon, Saint-Etienne, France</i>                                                                                   |           |
| 2. <i>MISUTECH, Saint-Etienne, France</i>                                                                                             |           |
| <b>Residual Stress in Heterogeneous Two-Phase Materials.....</b>                                                                      | <b>5</b>  |
| <i>Mohammed Belassel, Proto Manufacturing, Lasalle, Ontario, Canada</i>                                                               |           |
| <b>Residual Stress Using X-Ray Diffraction Techniques—Unified Approach.....</b>                                                       | <b>14</b> |
| <i>Mohammed Belassel<sup>1</sup>, James Pineault<sup>2</sup>, and Michael Brauss<sup>2</sup></i>                                      |           |
| 1. <i>Proto Manufacturing, Lasalle, Ontario, Canada</i>                                                                               |           |
| 2. <i>Proto Manufacturing, Taylor, Michigan, USA</i>                                                                                  |           |
| <b>SI-Traceability of XRD Residual Stress Data by Using Fe K<math>\alpha</math> Radiation.....</b>                                    | <b>22</b> |
| <i>Sebastian Send<sup>1</sup>, Johnathan Mohan<sup>2</sup>, Mikko Palosaari<sup>3</sup></i>                                           |           |
| 1. <i>Stresstech GmbH, Rennerod, Germany</i>                                                                                          |           |
| 2. <i>Stresstech Inc., Pittsburgh, Pennsylvania, USA</i>                                                                              |           |
| 3. <i>Stresstech Oy, Jyväskylä, Finland</i>                                                                                           |           |
| <b>Application of Contour Method for Residual Stress Analysis of Large and Complex Cross-Sections in Civil Engineering.....</b>       | <b>32</b> |
| <i>Dénes Kollár, András Horváth, Balázs Kövesdi, Attila László Joó, and István Völgyi</i>                                             |           |
| <i>Budapest University of Technology and Economics, Budapest, Hungary</i>                                                             |           |
| <b>The Effect of Low-Strain Prestretching at 77K on Quenching Residual Stress and Tensile Properties of 6061 Aluminum Alloys.....</b> | <b>42</b> |
| <i>Mingli Zhang, Kaixuan Gu, Xiujie Zhao, Junjie Wang</i>                                                                             |           |
| <i>University of Chinese Academy of Sciences, Beijing, China</i>                                                                      |           |
| <b>Prediction of Quenching Residual Stress of Al-Zn-Mg-Cu Alloy during Quenching and Cryogenic Treatment.....</b>                     | <b>49</b> |
| <i>Mingli Zhang, Kaixuan Gu, Xiujie Zhao, Junjie Wang</i>                                                                             |           |
| <i>University of Chinese Academy of Sciences, Beijing, China</i>                                                                      |           |

**Effect of High-Pressure Cooling and Cutting Speed on Residual Stresses Generated During Turning of an Advanced Wrought Nickel-Based Superalloy (AD730) using PCBN Tools.....57**

Henry Boyle<sup>1</sup>, Jinming Zhou<sup>2</sup>, Zhe Chen<sup>3</sup>, Jonas Holmberg<sup>4</sup>, Rachid M'Saoubi<sup>2,5</sup>, Alex Graves<sup>6</sup>, Lina Rogström<sup>1</sup>, Alexis Bohlin<sup>7</sup>, Stefan Cedergren<sup>7</sup>, Susanne Norgren<sup>2,6</sup>, and Ru Peng<sup>1</sup>

1. Linköping University, Linköping, Sweden
2. Lund University, Lund, Sweden
3. Siemens Energy, Finspang, Sweden
4. Research Institutes of Sweden, Mölndal, Sweden
5. Seco Tools AB, Fagersta, Sweden
6. Sandvik Coromant AB, Stockholm, Sweden
7. GKN Aerospace, Trollhättan, Sweden

**Investigation on the Residual Stresses in a Welded Longitudinal Gusset Joint Using Computational Weld Mechanics and Qualitative Barkhausen Noise Analysis.....65**

Jani Riski, Tero Pesonen, Antti Ahola, Tuomas Skriko, Timo Björk  
LUT University, Lappeenranta, Finland

**Residual Stress Development in Cold Spray Coatings: Insights from Curvature Measurements and Finite Element Analysis.....75**

Alfredo Valarezo<sup>1</sup>, Westly Castro<sup>1</sup>, and Sanjay Sampath<sup>2</sup>

1. University San Francisco of Quito, Quito, Pichincha, Ecuador
2. Stony Brook University, Stony Brook, New York, USA

**A Hybrid Surface Fitting Approach in the Contour Method for Residual Stress Assessments.....86**

Z. Cai and M.J. Roy, The University of Manchester, Manchester, United Kingdom

**Evaluating Residual Stress Profile in Cold Drawn 1018 Steel Rods Using Finite Element Analysis.....94**

Upama Biswas Tonny<sup>1</sup>, Mohamed Subair Syed Akbar Ali<sup>2</sup>, Daniel Barnard<sup>2</sup>, Sunil Kishore Chakrapani<sup>1</sup>

1. Michigan State University, East Lansing, Michigan, USA
2. Iowa State University, Ames, Iowa, USA

**Effects of Multiaxis Oscillations: A Novel Approach to Residual Stress Measurements via X-Ray Diffraction.....103**

James Pineault<sup>1</sup>, Jeff Taptich<sup>1</sup>, Jeff Nantais<sup>2</sup>, Mohammed Belassel<sup>2</sup>

1. Proto Manufacturing, Taylor, Michigan, USA
2. Proto Manufacturing, Lasalle, Ontario, Canada

**Geometric Effects of Linear Friction Welding on Residual Stresses.....111**

Jiaxi Zhang<sup>1</sup>, Anastasia Vasileiou<sup>1</sup>, Xenofon Gogouvitis<sup>2</sup>, Michael Preuss<sup>1,3</sup>, and Mike Smith<sup>1</sup>

1. The University of Manchester, Manchester, United Kingdom
2. Safran Landing System, Gloucester, United Kingdom
3. Monash University, Clayton, Victoria, Australia
