# TABLE OF CONTENTS

|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| Research on the Control Method of Multiple Small Spacecraft Based on Simplified Reinforcement Learning and Multi-Objective Optimization ..... | 1  |
| <i>Li Xinhang, Vsevolod V. Koryanov</i>                                                                                                       |    |
| Multi-spacecraft Hybrid Heuristic Cooperative Task Planning for Asteroid Exploration .....                                                    | 6  |
| <i>Bang Wang, Rui Xu, Zhaoyu Li, Shengying Zhu</i>                                                                                            |    |
| A Convex Optimization-Based Approach for Rapid Straight-Line Rendezvous of Spacecraft .....                                                   | 12 |
| <i>Hongcai Li, Xiang Zhang, Shuhui Fan, Hossam Hendy, Yanchen Pan</i>                                                                         |    |
| Optimized Attitude Maneuver Planning for Spacecraft with 2-DOF Turntables .....                                                               | 19 |
| <i>Zhe Zhu, Rui Xu, Zhaoyu Li, Shengying Zhu</i>                                                                                              |    |
| Aerodynamic Vibration and Suppression Methods of Aircraft .....                                                                               | 25 |
| <i>Cui Yuan, Ruojun Zhou, Yanjun Zhang, Bingyao Dou, Zimo Huo, Lu Xie</i>                                                                     |    |
| Study on Propagation Characteristics of Rotating Detonation Wave with Pre-heated CH <sub>4</sub> /CO/H <sub>2</sub> Gas Mixtures .....        | 30 |
| <i>Jinping Wang, Qiaodong Bai, Jiaxiang Han, Jing Liu, Quanbiao He, Quan Zheng, Chunsheng Weng</i>                                            |    |
| Research on Decoupling Technology for Flight-Measured Aerodynamic Loads .....                                                                 | 35 |
| <i>Chen Zhiming, Yu Yimeng, Meng Min</i>                                                                                                      |    |
| Study on Multiphase Flow and Thrust Characteristics at Launch-Tube Exit During Underwater Hot-Launch Missile Ejection .....                   | 40 |
| <i>Linhao Yuan, Jinsheng Xu, Haifeng Xue, Xiaowen Li, Huan Liu, Xiaobin Ren</i>                                                               |    |
| Numerical Study on Heat Transfer Performance of Reversed Spiral Fins .....                                                                    | 47 |
| <i>Yan Zhou, Uglanov Dmitry A, Junjie Liu</i>                                                                                                 |    |
| Thermal Control Design and Simulation for Orbital Biological Payload Using Hierarchical Heating Strategy .....                                | 53 |
| <i>Haojie Ji, Xiang Zhang, Hossam Hendy, Ao Chen, Jieyuyang Fu, Xuanyi Li</i>                                                                 |    |
| Real-time Prediction and Control Method of Taxiing Conflicts Based on Fuzzy Timing Workflow Net .....                                         | 60 |
| <i>Xiaoxuan Xie, Yong Tian, Jiangchen Li</i>                                                                                                  |    |
| An Improved Unperturbed Unit Vector Method for Initial Orbit Determination of Hyperbolic Orbits .....                                         | 71 |
| <i>Wang Xuliang, Guo Caifa, Chen Hongying, Kang Deyong</i>                                                                                    |    |
| A Simulation Mode of On-Board Firing Lithium Battery of Based on COMSOL .....                                                                 | 76 |
| <i>Xinyan Ma, Chaoyu Yang, Zhiyuan Shen</i>                                                                                                   |    |
| Study on Trajectory Optimization Design of Multi-pulse Long-range Guided Rocket Based on Particle Swarm Optimization .....                    | 81 |
| <i>Zhihang Wang, Hu Ma, Zhenjuan Xia, Junjie Wu</i>                                                                                           |    |
| Predictive Maintenance of Airbus A320 Air Conditioning System Using Machine Learning Models .....                                             | 90 |
| <i>Manyanga David Victor Vanessa, Wu Honglan</i>                                                                                              |    |
| Research on Cost-based Reliability Assurance Technology for Aerospace Product .....                                                           | 98 |
| <i>Liang Ao, Zexuan Jia</i>                                                                                                                   |    |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Application of an Optimized Isolation Forest Algorithm to Satellite Fault Detection .....                                                     | 104 |
| <i>Yanchen Pan, Xiang Zhang, Hao Lei, Hossam Hendy, Hongcai Li, Haojie Ji</i>                                                                 |     |
| Quantitative Evaluation Process for Reliability Optimization Design and Weak points Analysis of Reusable Spacecraft Systems .....             | 113 |
| <i>Wenming Zhou</i>                                                                                                                           |     |
| Optimization of eVTOL Lift/Thrust Unit Drive Motor Fault Detection Threshold for Airworthiness .....                                          | 122 |
| <i>Liqun Ma, Chenchen Ma, Jianzhong Yang</i>                                                                                                  |     |
| Analysis and Implementation of QEMU-Based ARM Device Virtualization for Integrated Electronic Embedded Systems in Micro/Nano Satellites ..... | 128 |
| <i>Jin Ni, Yongjun Yu, Wenhe Liao, Hongming Zhang, Bing Xu</i>                                                                                |     |
| The Influence of Information Timeliness on the Decision of Forest Fire Fighting Aircraft Scheduling .....                                     | 133 |
| <i>Guo Shiguang, Gao Shangfeng, Wang Hanyu</i>                                                                                                |     |
| Analysis of Flow and Heat Transfer in an Inlet for Wide-Range Pre-Cooled Aircraft .....                                                       | 138 |
| <i>Bing Zhou, Zhongjin Zheng, Han Yin, Bo Sun</i>                                                                                             |     |
| Study on Low-Altitude Control Mode of Large Fixed-Wing Fire Fighting Aircraft at Home and Abroad .....                                        | 145 |
| <i>Guo Shiguang, Gao Shangfeng, Wang Hanyu</i>                                                                                                |     |
| Autopilot Design For Fixed Wing Aircraft Under Colored Noise .....                                                                            | 150 |
| <i>Ismet Husrev Akay, Hakan Temeltas</i>                                                                                                      |     |
| The Application of UAV in Test Flight of a Large Domestic Firefighting Aircraft in the Future .....                                           | 157 |
| <i>Gao Shangfeng, Guo Shiguang, Zhou Xiang, Wang Hanyu</i>                                                                                    |     |
| Assessment of Handling Characteristics for the Hover Mission Task Element of TRC-based Evtol Aircraft .....                                   | 161 |
| <i>Liqun Ma, Ziteng Liu</i>                                                                                                                   |     |
| A Trajectory Fusion Algorithm Combining Aircraft ADS-B Feature with SSR Data .....                                                            | 167 |
| <i>Hao Yu, Zhiyuan Shen</i>                                                                                                                   |     |
| Deep Learning-Based Rapid and Accurate Prediction Method for Internal Ballistics of Solid Rocket Motors .....                                 | 173 |
| <i>Yixiong Wang, Xinyi Yuan, Weitao Wu, Hongbin Yan</i>                                                                                       |     |
| Research on Thrust Vector Control Technology for Rotating Detonation Engines Based on Zoned Fuel Supply .....                                 | 179 |
| <i>Zhenghao Wang, Dong Wang, Hu Ma</i>                                                                                                        |     |
| Numerical Analysis of the Effect of Air Intake Exit Distortion on the Operational Performance of a Solid Fuel Ramjet .....                    | 184 |
| <i>Yonghui He, Wenxiang Cai, Qi Shao, Weimin Huang, Tianle Liang, Kaiqiang Fang</i>                                                           |     |
| Dynamic Decoupling Control of Propeller-Engine Coupling System Based on Disturbance Observer and Feedforward-Feedback .....                   | 190 |
| <i>He Sun, Tao Suo, Chuanchao Liu, Changxia Zhao</i>                                                                                          |     |
| Thrust Vectoring Simulation Study of Rotating Detonation Engine .....                                                                         | 200 |
| <i>Wenjie He, Zhenjuan Xia, Hu Ma</i>                                                                                                         |     |

|                                                                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Study on the Influence of Gas Inlet Structure on the Performance of Solid Ramjet Engines .....                                                                         | 207 |
| <i>Tianle Liang, Yonghui He, Mingcheng Zhang, Wenxiang Cai</i>                                                                                                         |     |
| Laser-Assisted Grinding and Polishing of Titanium Alloys .....                                                                                                         | 213 |
| <i>Sifan Huo, Yunzhou Ma, Zhiquan Guo, Yan Wang, Zhongpeng Zheng, Jingnan Zhao</i>                                                                                     |     |
| Analysis and Comparison of Techniques for Artificially Preparing Typical Aero-Engine Disk Material Defects .....                                                       | 219 |
| <i>Xingyu Zhang, Huimin Zhou, Guo Li, Shuiting Ding, Gong Zhang, Bo Zhen</i>                                                                                           |     |
| Microstructure Evolution and Mechanical Properties of Al-Cu-Mg-Ag Alloy are Investigated Through Heat Treatment .....                                                  | 225 |
| <i>Yujie Chang, Zhi He, Zhifei Xu, Min Xu, Xiaoming Yin, Yan Wang, Wenhui Li</i>                                                                                       |     |
| Neural Radiance Field (NeRF) Based Nozzle Reconstruction: A Novel Approach for 3D Morphology Modeling .....                                                            | 231 |
