# TABLE OF CONTENTS

|                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------|----|
| Design of Modbus TCP/RTU Communication Gateway Based on FPGA .....                                                                     | 1  |
| <i>Cheng Zhang, Zhe Yu, Fang Chen, Bin Wang, Shunmin Zhou</i>                                                                          |    |
| Non-binary LDPC Code-Based Post-Processing Protocol for QKD .....                                                                      | 6  |
| <i>Qixiang Chen, Jiajia Han, Yuxiang Lv, Yining Mao, Hao Wu, Xin Sun, Pang Lv</i>                                                      |    |
| Lightweight Adaptive Differential Privacy for Federated Learning in Internet of Vehicles .....                                         | 10 |
| <i>Shuju Yu, Yuchuan Fu, Changle Li, F. Richard Yu</i>                                                                                 |    |
| Wireless Cooperative Lightweight Ad Hoc Network Control Method Considering Wireless<br>Communication Network Congestion .....          | 14 |
| <i>Xiong Xiao, Zhongfeng Wang, Shuai Shao, Ligang Li, Shijie Cui</i>                                                                   |    |
| ReasonTele: Enhancing LLM Task Planning in Telecommunication Network Operations and<br>Maintenance via CoT-Driven Data Synthesis ..... | 19 |
| <i>Jun Liu, Wei Wu, Xiaofeng Zhang, Zhuo Chen, Hong Li, Xin Chen, Xiaozhao Xuan, Zuozhong Zhang<br/>Bingzhan Zhang, Kuang Xu</i>       |    |
| Multi-antenna Jammer Assisted Distributed Integrated Sensing and Covert Communications<br>Framework .....                              | 25 |
| <i>Yutao Wang, Weiwei Yang, Mengmeng Bai, Xinwei Zhu</i>                                                                               |    |
| Design and Implementation of a Heterogeneous Network Communication Gateway for Industrial<br>Control Systems Based on APL .....        | 32 |
| <i>Bingjun Yan, Mingxu Gang, Bo Hu</i>                                                                                                 |    |
| Discussion on Network Security Evaluation of Analytic Connection Number AHP Based on<br>Multivariate Set Pair .....                    | 39 |
| <i>Shaohua Sun, Shengcheng Liu, Guoqing Wang, Xing Zhang</i>                                                                           |    |
| Energy-Balanced Clustering Routing Algorithm for Wireless Sensor Networks Based on Evolutionary<br>Game Theory .....                   | 43 |
| <i>Jing Li</i>                                                                                                                         |    |
| DBSCAN+UKF: Mobility-Predicted Clustering for Digital-Twin-Assisted Vehicular Task Offloading .....                                    | 48 |
| <i>Xiaoming Yuan, Ruifan Gao, Jiaqi Zhao, Yijing Liu, Jianbo Du, Guangxia Xu</i>                                                       |    |
| Transfer-based DRL for Network Slicing Resource Allocation in Radio Access Network .....                                               | 54 |
| <i>Yuanzheng Ou, Jianbin Zheng, Tinghong Rong</i>                                                                                      |    |
| Design of fast impedance matching circuit for RF power supply based on GaN .....                                                       | 60 |
| <i>Chenggao Li, Haiping Ren</i>                                                                                                        |    |
| High-Speed Link Adaptive DFE Design Based on Improved Variable Step-Size Strategy .....                                                | 65 |
| <i>Jingjie Zou, Qiang Chen, Wenliang Nie, Xiangfei Nie</i>                                                                             |    |
| Direct Position Determination of OFDM Sources in Multipath Environment: An Improved Extended<br>Subspace Data Fusion Algorithm .....   | 70 |
| <i>Shenghui Zhao, Jiaju Yao, Bingzhi Shi, Biyuan Xu, Jinke Cao, Xiaofei Zhang</i>                                                      |    |

|                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------|-----|
| Closed-Loop Multi-Agent Smoke Screen Interference Collaborative Optimization Driven by “Planning - Memory - Reflection” .....    | 76  |
| <i>Yulong Chen, Zhen Luan, LinXiang Tang, Chengrui Zhi, Xinyao Li, Yang Zhou</i>                                                 |     |
| Intelligent Anti-Malicious Jamming Game for UAVs in Multi-Hop Communication: A MAPPO-based Learning Approach .....               | 82  |
| <i>Sen Li, Cong Yang, Hongyang Nie, Menglin Niu</i>                                                                              |     |
| PUF-Assisted Secure Device Access for Industrial Control Crowdsourcing Platforms .....                                           | 88  |
| <i>Xin Liu, Yuan Gao, Lei Li, Rui Wang, Donglan Liu, Hao Zhang, Yuntao Wang, Zhou Su</i>                                         |     |
| Signal Anomaly Detection Method Based on Operational Condition-Adaptive Prediction and Residual Analysis .....                   | 93  |
| <i>Ruiqian Nie, Li Shen, Shanshan Yu, Hao Tang, Xiaowei Zhu</i>                                                                  |     |
| A 100-Gb/s PAM-4 Analog Front-End with 15.8-dB Peaking and Current-Reuse Hybrid Equalization in 65-nm CMOS .....                 | 98  |
| <i>Shun Bai, Hongyu Pan, Xueming Wei, Yusong Lin</i>                                                                             |     |
| The Transformer as a Parametric Filter for Sequence MIMO Equalization .....                                                      | 102 |
| <i>Kai Yu, Yulan Gao, Yijing Lin, Zhonghao Lyu, Jiwei Zhao, Ming Xiao</i>                                                        |     |
| Budgeted Multi-Agent Routing: Adaptive Role Assignment and Communication Compression for Efficient LLM-Agent Collaboration ..... | 108 |
| <i>Linghao Yang, Yilun Wu, Rao Xu, Kaili Zhang, Xikai Yang, Ke Wu</i>                                                            |     |
| Design and Implementation of a QoS-Driven Resource Allocation Algorithm for LoRa Multi-Channel Gateway Networks .....            | 113 |
| <i>Qingzheng Li, Dongsheng Zhao, Yawen Dai</i>                                                                                   |     |
| Unmanned Aerial Vehicle Path Planning Based on the MCSD-GWO Algorithm .....                                                      | 119 |
| <i>Sifan Sun</i>                                                                                                                 |     |
| A Phishing URL Detection Method Based on Gaussian Blur and Resnet-Atten .....                                                    | 125 |
| <i>Xingwang Li, Pengyu Chen, Wenguan Ning, Xiaoqin Li, Yu He, Juan Wen</i>                                                       |     |
| Linguistic Prior-Enhanced Open Information Extraction: Contrastive Learning and Optimal Transport Approach .....                 | 130 |
| <i>Xiaoyu Wang</i>                                                                                                               |     |
| Semantic Retrieval-Augmented Large Language Models for Knowledge Graph Completion .....                                          | 141 |
| <i>Zirun Cai, Shengchun Ding</i>                                                                                                 |     |
| Scale-Exchange Attack: Enhancing Adversarial Transferability via Multi-scale Block Transformation and Replacement .....          | 145 |
| <i>Hao Chen, Qiyu Zhu, Ximeng Liu</i>                                                                                            |     |
| Improved Few-shot Object Detection via Mamba and Cross-Attention Mechanisms .....                                                | 153 |
| <i>Lili Wen, Man Wu, Liulin Lu</i>                                                                                               |     |
| Solving the Dual Vector of Convolutional Codes Based on Gaussian Elimination .....                                               | 158 |
| <i>Jiyuan Tan, Shihong Xing, Xingxuan Liu, Zheping Wu</i>                                                                        |     |
| Partial offloading algorithm for edge computing based on MAPPO .....                                                             | 163 |
| <i>Wenhao Yu, Haofeng Wang, Manfei Zhao, Ning Zhang, Tong Gao, Zongyu Wang, Qiuyi Qu, Yanxiang Ji</i>                            |     |

|                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------|-----|
| RL-Based Optimal Low-Altitude Trajectory Tracking for UAVs with Finite-Time Weight Convergence .....                        | 176 |
| <i>Zekai Zhang, Xiangwang Hou, Tianyun Ding, Jingjing Wang, Jiacheng Wang, Jun Du, Xianghe Wang</i>                         |     |
| Structure-Aware Decoding Mechanisms for Complex Entity Extraction with Large-Scale Language Models .....                    | 182 |
| <i>Zhimin Qiu, Di Wu, Feng Liu, Yuxiao Wang</i>                                                                             |     |
| Optical Quantum Depth Imaging Method Based on Scale Space Peak Tracking Algorithm .....                                     | 187 |
| <i>Jingyang Cao, Zhongyin Hu, Mu Zhou, Wei Zhu, Jiaji Zhu, Mengqiu Tian</i>                                                 |     |
| Data-driven core loss modeling of magnetic components .....                                                                 | 191 |
| <i>Manman Yang</i>                                                                                                          |     |
| A Lightweight Attention Dual-Branch Network for Low-Elevation DOA Estimation .....                                          | 195 |
| <i>Siqi Ni, Yanping Liao, Hang Jiang, Mingfei Zhao</i>                                                                      |     |
| InSAR Phase Denoising by Fusing Adaptive Frequency-Domain Filtering and Improved BM3D .....                                 | 200 |
| <i>Yuejuan Chen, Qiang Gong, Pingping Huang, Weixian Tan, Yaolong Qi, Zhiguo Wang</i>                                       |     |
| A Cost-Sensitive XGBoost Training and Decision Framework for Highly Imbalanced Binary Classification Tasks .....            | 204 |
| <i>Bangde Cao, Changwenyan Chen, Hang Liu, Yanfang Yin</i>                                                                  |     |
| EEG2Vision: High-Fidelity Image Reconstruction from EEG via Temporal-Spectral Fusion and Cross-Modal Alignment .....        | 210 |
| <i>Yan Wang</i>                                                                                                             |     |
| Opinion Manipulator Identification Based on Semantic Mutation and Abnormal Propagation Analysis .....                       | 215 |
| <i>Ziang Gao</i>                                                                                                            |     |
| Container Damage Detection Based on SelfContrastive Learning and Deep Convolutional Neural Networks .....                   | 221 |
| <i>Liangxiao Zhang</i>                                                                                                      |     |
| Asynchronous Brain-Computer Interface EEG Signal Classification Method Based on CNN and Its Philosophical Reflections ..... | 226 |
| <i>Xi Yang, Song Zhou</i>                                                                                                   |     |
| Depth-Aware Vision Transformer for Transparent Object Depth Completion .....                                                | 232 |
| <i>Jian Huang, Jingjie He, Gongwei Fang</i>                                                                                 |     |
| ST-MSHT-Net: A Soft-Thresholding Multi-Stream Hybrid Temporal Network for Automatic Modulation Recognition .....            | 237 |
| <i>Zhaoqi Cai, Yuan'An Liu, Dongming Yuan</i>                                                                               |     |
| Support Vector Regression with Superpixel-Guided Sampling for trimap generation .....                                       | 242 |
| <i>Weiguang Han, Guilin Yao</i>                                                                                             |     |
| Research on Effluent Total Phosphorus Prediction in Reclaimed Water Plants Based on Improved CPO-Optimized LSTM .....       | 247 |
| <i>Tonglai Xue, Xiangcen Liu, Conghan Zhang, Meng Zhou</i>                                                                  |     |
| Path Planning for Medical Transport Robots Based on an Improved A* Algorithm and the Dynamic Window Approach .....          | 253 |
| <i>Gaoqin Zhong, Zhiran Ji, Yu Cao, Junwen Lai, Zezhen Huang, Libin Feng</i>                                                |     |
