# TABLE OF CONTENTS

|                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------|----|
| Power Quality Analysis on Peak Demand Reductions using Battery Energy Storage System .....                                    | 1  |
| <i>Hao Zhe Tan, Md Mahmudul Hasan, Lee Cheun Hau, Yun Seng Lim, Jianhui Wong</i>                                              |    |
| <i>Nor Shahida binti Hasan, Siti Nadiyah Mohd Sanihie</i>                                                                     |    |
| State of Charge Distribution Estimation in Lithium-ion Battery Using Ultrasonic Scanning and GWO-MLP Model .....              | 6  |
| <i>Ting Wang, Youyuan Wang, Dongning Huang, Zhiwei Shen</i>                                                                   |    |
| An Enhanced Li-ion Battery Model with Optimized OCV Estimation .....                                                          | 13 |
| <i>Oh Sing Ee Jenna, Feng Fred Wei, Cai Zhi Qiang, D Yang Eng</i>                                                             |    |
| Battery State of Health (SoH) Estimation using LSTM-Based Deep Learning .....                                                 | 18 |
| <i>Oh Sing Ee Jenna, Feng Fred Wei, Cai Zhi Qiang, D Yang Eng</i>                                                             |    |
| State of Health Estimation Method for Lithium-ion Batteries Based on Equivalent Circuit Model and Segmented EIS .....         | 23 |
| <i>Huicong Liu, Ting Wang, Dongning Huang, Youyuan Wang</i>                                                                   |    |
| Investigation of Comprehensive Resilience Evaluation Method for Multi-Energy Coupled Active Distribution Networks .....       | 28 |
| <i>Lei Chen, Yuqi Jiang, Hongkun Chen, Shencong Zheng, Yao Guo, Xiaoxuan Guo</i>                                              |    |
| Fault Localization in High-Voltage Transmission Lines Using Scalogram Signal Analysis .....                                   | 36 |
| <i>Hana Sulthanah, Novizon, Syafii, Marta Hardiyanti Mursat</i>                                                               |    |
| A Graph Neural Network-based Dynamic Network Topology Detection Method in Power Systems .....                                 | 41 |
| <i>Xianghua TAI, Shengping SU, Chunrong MIAO, Lijuan YE, Guochao ZHU, Ke LI, Zhimao GONG</i>                                  |    |
| Voltage Sag Classification and Cause Identification Based on Pattern Recognition .....                                        | 46 |
| <i>Haodong Cai, Haoyong Chen</i>                                                                                              |    |
| Day-Ahead Market Clearing Model for HVDC-Interconnected Multi-Area Systems with Renewable Energy .....                        | 53 |
| <i>Junlei Liu, Feng Li, Xinmiao Liu, Chong Tang, Xun Lu, Yuanyuan Lou, Chu Jin</i>                                            |    |
| Dual-layer Optimization Configuration of Zero-Carbon Emission Electric-Hydrogen Storage Microgrid under Multi-Timescale ..... | 60 |
| <i>Hongxia Guo, Peiqing Xiao, Haoyong Chen, Qian Ma</i>                                                                       |    |
| The Impact of Forecasting Time Horizon on BESS Performance: A Comparative Study for Peak Demand Reduction .....               | 65 |
| <i>Benjamin Wong Mun Fhee, Yun Seng Lim, Hao Zhe Tan, Md Mahmudul Hasan</i>                                                   |    |
| Novel Exponential Sliding-Mode Current Control for PMSGs with High-Gain Disturbance Observer .....                            | 70 |
| <i>Xiaoling Su, Yongkai Jiang, Mengsong Liu, Cheng Zhang, Tianqi Yin, Chun Wei</i>                                            |    |
| Robust Scheduling of Hydro-Wind-Solar Complementary Power Systems Considering Multi-Timescale Flexibility Coordination .....  | 76 |
| <i>Wenkai Wang, Haoyong Chen</i>                                                                                              |    |

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| GFM/VSM Control for Weak-Grid Interconnections: Small-Signal Damping, Black-Start Performance,<br>and Design Trade-Offs on a Two-Area Benchmark ..... | 83  |
| <i>Ge Chen, Yuhui Huo, Yufei Zhao, Wei Chen</i>                                                                                                       |     |
| Anti-Tap Hunting Coordination of Q-V Droop with OLTC/SVR on R/X-Heavy Feeder .....                                                                    | 88  |
| <i>Bo Cao, Ge Chen, Wei Chen, Xinyu He</i>                                                                                                            |     |
| Quantum Machine Learning for Smart Grid Load Balancing .....                                                                                          | 94  |
| <i>Guan Hong, A Fong</i>                                                                                                                              |     |
| SecureChunk: A PKI-Free End-to-End Tamper-Resistant File Transfer Scheme .....                                                                        | 99  |
| <i>Yizhen Sun, Zheng Tian, Weisheng Zhang, Yibo Chen, Zhibang Yang</i>                                                                                |     |
| Single Objective Hybrid PSOGWO Algorithm for Optimal Micro-PMU Placement .....                                                                        | 105 |
| <i>Asjad Ali, Noor Izzri Abdul Wahab, Mohammad Lutfi Othman, Rizwan Farade</i>                                                                        |     |
| Research on Scaled and Flexible Resource P2P Transactions Based on ADMM .....                                                                         | 111 |
| <i>Yaoyu Qiu, Haoyong Chen</i>                                                                                                                        |     |
| A Graph Neural Network-Based Surrogate Modeling Framework for Topology-Aware Corrective<br>Security Dispatch .....                                    | 118 |
| <i>Liwan Zhou, Haoyong Chen</i>                                                                                                                       |     |
