|                                                                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Preface .....                                                                                                                                                           | 2  |
| <b>Section 1. Electrical Engineering (Theory and Applications)</b>                                                                                                      |    |
| Acoustic Gas Volume Concentration Meter Experimental Verification .....                                                                                                 | 4  |
| <i>Artemova Svetlana V., Ladynin Andrey I., Kamenskaia Maria A., Shmeleva Nina M., Lemeshenko Semen M.</i>                                                              |    |
| Features of Constructing a Mathematical Model and Its Software Implementation for Predicting Radon Flux Densities<br>in the Anomalous Zone of Mount Beshtau (KMV) ..... | 9  |
| <i>Baryshnikov Andrey A.</i>                                                                                                                                            |    |
| Development of the CarMIEM Wheeled Platform for Early Specialization and Hackathon-Based Engineering Education ...                                                      | 13 |
| <i>Bezukladov Viktor Y., Ershov Vladimir A., Batashova Alina A., Rakotonindrainy Mihaja</i>                                                                             |    |
| Predictive Monitoring of Main Pipeline Safety: An Automated Pressure Forecasting and Risk Assessment Approach .....                                                     | 17 |
| <i>Breusova Ekaterina. K., Tsapleva Valentina. V.</i>                                                                                                                   |    |
| Algorithmic Framework for an Information-Measurement System for Comprehensive Environmental Impact<br>Assessment and Emergency Detection .....                          | 23 |
| <i>Bryzgalo Vera S., Alekseev Vladimir V., Orlova Natalia V.</i>                                                                                                        |    |
| Application of the Wavelet Transform Apparatus in the Analysis of the Structure of Radio Signals .....                                                                  | 27 |
| <i>Dianov Aleksey, Gaivoronsky Dmitry</i>                                                                                                                               |    |
| Development of an Architectural Framework for Cognitive Adaptation of Specialized Texts .....                                                                           | 32 |
| <i>Ermakova Polina, Isaeva Ekaterina</i>                                                                                                                                |    |
| Influence of Return Conductor of Primary Winding on the Error of a Single-Turn Window-Type Current .....                                                                | 39 |
| <i>Ermolaev Maksim V., Paramonov Evgenii D., Sakhno Liudmila I., Sakhno Olga I</i>                                                                                      |    |
| Modeling of Perovskite Solar Cells .....                                                                                                                                | 44 |
| <i>Gadzhey Artem O., Muratova Ekaterina N., Kozlov Sergey V.</i>                                                                                                        |    |
| The Concept of Constructing Normalized Scales for Diagnostic Results of Complex Objects .....                                                                           | 49 |
| <i>Geleta Artem A., Suloeva Elena S.</i>                                                                                                                                |    |
| Field Single-Phase Earth Faults in a Marine Electrical Power System .....                                                                                               | 53 |
| <i>Grigorev Vladislav</i>                                                                                                                                               |    |
| Remaining Useful Life Prediction of Rolling Bearings via Dual-Branch Adaptive Physics-Informed Neural Networks .....                                                    | 57 |
| <i>Guo Chenxi, Li Ziming, Wang Ding, Yan Mengxue</i>                                                                                                                    |    |
| Acoustic-Based Liquid Classification and Identification Using the Kolmogorov–Arnold Network (KAN) Architecture .....                                                    | 64 |
| <i>Houndjetode Jacques, Wilfried Kano, Suslava Anastasiya, Nekrasov Hlib</i>                                                                                            |    |
| Investigation of the Effect of the Instability of the Discriminator Gas Cell Thermostat on the Metrological Characteristics of<br>the Rubidium Frequency Standard ..... | 68 |
| <i>Isupova Ekaterina</i>                                                                                                                                                |    |
| Automatic Parameter Identification for Electric Drives: Ensuring High Accuracy and Adaptive Control Systems .....                                                       | 73 |
| <i>Korolev Alexander, Senkevich Andrew</i>                                                                                                                              |    |
| Low-noise Voltage Reference for MEMS Sensor Readout .....                                                                                                               | 78 |
| <i>Kozlov Alexey S., Pilipko Mikhail M., Tulaev Artem T., Belyaev Yakov V.</i>                                                                                          |    |
| Efficient Control of Wind Turbine for Different Wind Speeds .....                                                                                                       | 81 |
| <i>Kozlova Liudmila P., Kozlova Olga A.</i>                                                                                                                             |    |
| Conceptual Aspects of Intelligent Systems in Production .....                                                                                                           | 85 |
| <i>Kozlova Liudmila P., Kozlova Olga A.</i>                                                                                                                             |    |
| Reactive Power Compensation Using Static Capacitor Banks During Startup of a Squirrel-Cage Induction Motor .....                                                        | 89 |
| <i>Litvinova Sofya V., Amantayeva Amina, Khasanova Anastasia</i>                                                                                                        |    |

|                                                                                                                                                                          |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Enhancing Gas Turbine Engine Digital Twin Adequacy Through Hybrid Modeling: Combining First-Principles Calculations and ML Error Correction .....                        | 92  |
| <i>Ludishchev Iaroslav V.</i>                                                                                                                                            |     |
| Designing an Automatised Ultrasonic Non-destructive Testing System for a Hot-dip Zinc Bath .....                                                                         | 96  |
| <i>Manakov Anatoly S., Bunakov Anton, Burakevich Dmitry A., Teplyakova Aleksandra V., Pavros Kirill S.</i>                                                               |     |
| Problems of Forming a Technological Process Management Stack in Cyber-Physical Systems .....                                                                             | 100 |
| <i>Mavrin Daniil, Brusakova Irina A.</i>                                                                                                                                 |     |
| Comparative Analysis of Reinforcement Learning, LQR, and MLP Control Methods for Pupil Tracking in Teleophthalmology .....                                               | 104 |
| <i>Mayya Ali Sultan, Moussa Zein Mohammad</i>                                                                                                                            |     |
| The Development of a Double-Circuit Overhead Transmission Line Model in Phase Coordinates for Calculating the Steady-State Secondary Arc Current in the SPAR Cycle ..... | 108 |
| <i>Mikhailov Denis O., Sheskin Evgeniy B.</i>                                                                                                                            |     |
| Electric Power Ecosystems Balanced Development Analytical Software .....                                                                                                 | 113 |
| <i>Mityakov Evgenii S., Ladynin Andrey I., Shmeleva Anna G., Shmeleva Nina M.</i>                                                                                        |     |
| Comparative Analysis of Text Extraction Methods from PDF Files for Subsequent Data Processing .....                                                                      | 118 |
| <i>Myasoedov Vladislav A., Vishnevskaya Julia A.</i>                                                                                                                     |     |
| Comparative Study of Current Regulation Algorithms in the Gradient Coils of a Low-Field Magnetic Resonance .....                                                         | 122 |
| <i>Patrashevskii Aleksandr A., Mamatov Aleksandr G., Matnina Aleksandra V., Lovlin Sergei Yu., Tsvetkova Madina H., Demidova Galina L.</i>                               |     |
| Development of an Inter-Satellite Network for Space Debris Evasion .....                                                                                                 | 127 |
| <i>Popov Alexander</i>                                                                                                                                                   |     |
| Natural Language Processing Pipeline for a Comparative Two-language Discourse Analysis Based on HiTech Contexts ..                                                       | 131 |
| <i>Rakina Mariya S., Fadeeva Aleksandra D., Isaeva Ekaterina V.</i>                                                                                                      |     |
| Hibrid Microfluidic System for Quantitative Detection of Doxorubicin and Bicalutamid in Oncotheranostics .....                                                           | 138 |

| Modeling and Design of an Adaptive Control System for a Self-Balancing Platform on Marine Vessels .....                                            | 346 |
| <i>Nguyen Dinh Khanh, Pham Van Tuan, Ngo Kien Dinh, Nguyen Van Luat</i>                                                                            |     |
| Design of Fuzzy Sliding Mode Observer with Saturation Function for Sensorless PMSM .....                                                           | 350 |
| <i>Nguyen Duy Thang, Belov Mikhail P., Nguyen Duy Khanh, Nguyen Minh Duc</i>                                                                       |     |
| Investigation of Random Processes Affecting the Operation of the Ventilation and Air Conditioning System .....                                     | 355 |
| <i>Nguyen Minh Duc, Belov Mikhail P., Belov Alexander M.</i>                                                                                       |     |
| Implementation of CI/CD in Industrial Automation.....                                                                                              | 359 |
| <i>Oleynikov Vitaly S., Zhdamirova Elizaveta V., Aleksandrova Olga S.</i>                                                                          |     |
| Hybrid Genetic Algorithm and Fuzzy Control Approach for Lunar Lander Soft Landing .....                                                            | 362 |
| <i>Oleynikov Vitaly S., GuanTianyi</i>                                                                                                             |     |
| Fuzzy Logic-Based Spacecraft Docking Algorithm.....                                                                                                | 367 |
| <i>Oleynikov Vitaly S., Aleksandrova Olga S., Khasanova Aliia R., Zubkov Timothy S.</i>                                                            |     |
| Application of Simple Neural Networks to Control Nonlinear Objects in the Context of Industry 4.0 .....                                            | 371 |
| <i>Oleynikov Vitaly S., Osadchaya Alina M., Komina Alena A.</i>                                                                                    |     |
| Microgrid Energy Management with Multi-Agent Coordination Supported by Machine Learning Forecasting .....                                          | 376 |
| <i>Pushkar Daniil, Demidova Galina, Jackson J. Justo, Lukichev Dmitry, Poliakov Nikolai</i>                                                        |     |
| Improvement of the DACKEL Tracked Platfor .....                                                                                                    | 382 |
| <i>Roslavtsev Maksim, Makoundou Mayala Prince Amour, Braulio Medina Galindo, Nekrasov Hlib A.</i>                                                  |     |
| Generation of the Laser-Cutting Trajectory for a Metal Sheet Based on the Drawing, and Quality Control<br>of the Cut Product .....                 | 387 |
| <i>Shevchenko Anna A.</i>                                                                                                                          |     |

|                                                                                                                                      |     |
