# TABLE OF CONTENTS

|                                                                                                                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|-----|
| Coherent Noise Sources in Subsonic Lobed Jets .....                                                                             | 1   |
| <i>Jackson S. Larisch, K. K. Ahuja</i>                                                                                          |     |
| Modeling Turbulence at High Strouhal Number Flows for Accurate Noise Predictions .....                                          | 24  |
| <i>David Nguiffo, Yang Chao, Dennis M. O'Connor</i>                                                                             |     |
| Experimental Analysis of Surface-Pressure–Driven Far-Field Noise in Impinging Jet Flows .....                                   | 39  |
| <i>Reza Maryami, Aaron Alexander, Brian Elbing</i>                                                                              |     |
| Acoustics of Single Slot Style Fluidic Injections on Rectangular Nozzles at Overexpanded Flow<br>Conditions .....               | 55  |
| <i>James Cramer, Kaurab Gautam, Arshad Mohammed, Ephraim Gutmark</i>                                                            |     |
| Fundamental Study of the Transmission Loss of Jet Noise Through Water Curtains .....                                            | 79  |
| <i>Trushant K. Patel, Kamal Viswanath</i>                                                                                       |     |
| Development of a Rapid Acoustic Prediction Methodology for Conceptual Electric Aircraft .....                                   | 89  |
| <i>Slade P. Brooks, Peter N. Sorensen, Daniel R. Cuppoletti</i>                                                                 |     |
| Prediction of Performance and Noise of a Small Quadrotor using CHARM .....                                                      | 109 |
| <i>Adam Rozman, Elliot Macrae-Sadek, Jingrong Jiang, Sophia Becken, Elliot Dy, Mei Cable,<br/>David Gardner, Sheryl Grace</i>   |     |
| Study of Propeller Noise Under Edgewise and Transition Flight Conditions for Urban Air Mobility .....                           | 130 |
| <i>Jie Hua, Michael Marques, Vladimir Golubev, Anastasios S. Lyrantzis, Reda R. Mankbadi</i>                                    |     |
| Active Control of Acoustics in a Supersonic Circular Jet.....                                                                   | 144 |
| <i>Karli Katterle, Noah Hiler, Mason Mitchell, Nathan Webb, Mo Samimy</i>                                                       |     |
| Spectral Peaks Due to ‘Guided Jet Waves’ in Plug Nozzle Flows.....                                                              | 156 |
| <i>Amy F. Fagan, Khairul B. M. Q. Zaman</i>                                                                                     |     |
| Experimental Investigation of Upstream Geometry Effects on Screech Feedback Mechanisms in<br>Twin Supersonic Jets .....         | 170 |
| <i>Arshad Mohammed, Kaurab Gautam, Aatresh Karnam, Mohammad Saleem, Ephraim<br/>Gutmark</i>                                     |     |
| Effect of Upstream Geometry on Broadband Shock Associated Noise and Screech Tones in<br>Trapezoidal Nozzles .....               | 185 |
| <i>Andrew Russell, Arshad Mohammed, James Cramer, Kaurab Gautam, Ephraim Gutmark</i>                                            |     |
| Mapping Azimuthal Distribution of Supersonic Twin Rectangular Jet Noise .....                                                   | 197 |
| <i>Kaurab Gautam, Arshad Mohammed, James Cramer, Ephraim Gutmark</i>                                                            |     |
| Towards Noise Mitigation in Twin Supersonic Rectangular Jets: Baseline Large-Eddy Simulation<br>and Validation.....             | 211 |
| <i>Jun Yamasaki, Steven Dai, Olivia Martin, Sanjiva Lele, Kaurab Gautam, Arshad Mohammed,<br/>James Cramer, Ephraim Gutmark</i> |     |
| Noise Reduction of Main Landing Gear of High-Lift Common Research Model.....                                                    | 228 |
| <i>Yasushi Ito, Takehisa Takaishi, Yuta Ozawa, Tohru Hirai, Keiji Shimoda, Hasan K. Jawahar</i>                                 |     |

|                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Comparison of Tip Vortex Noise for Squared and Rounded Tips.....                                                                                   | 242 |
| <i>Alyssa Freed, Jordon Won, Seongkyu Lee</i>                                                                                                      |     |
| JAIC: Cavity Acoustic-Intelligent Analysis.....                                                                                                    | 263 |
| <i>Bruce A. Jolly, Wali Aziz, Emily Pavuk</i>                                                                                                      |     |
| Evaluation of Quadrupole Correction Techniques in Spectral FWH Analogy for Complex Flow Configurations .....                                       | 279 |
| <i>Damiano Casalino, Naina Pisharoti</i>                                                                                                           |     |
| Toward Resolvent-Based Estimation and Control of Wavepackets in Supersonic Turbulent Jets.....                                                     | 295 |
| <i>Yuhao Zhou, Aaron Towne, Junoh Jung, Rutvij Bhagwat, Eduardo Martini, Peter Jordan, Diego B. S. Audiffred, Igor Maia, André V. G. Cavalieri</i> |     |
| Wind Noise Mitigation of Infrasound Sensor Payloads on High Altitude Balloons.....                                                                 | 310 |
| <i>Kate Spillman, Jamey D. Jacob, Brian Elbing</i>                                                                                                 |     |
| Experimental Study of Wall-Induced Cavitation and Acoustic Softening Leading to Choking in Aerospace Fluids .....                                  | 322 |
| <i>Sameeha Khan, Yaman Vohra, Shivansh Rana, Anandmoorthi Thaarutraj, V. R. Sanal Kumar</i>                                                        |     |
| Verification Framework for Acoustic Mode Predictions in Ducted Swirling Flows .....                                                                | 335 |
| <i>Jeffrey Severino</i>                                                                                                                            |     |
| Boundary Layer Turbulence and Wall Pressure Fluctuations in the Wake of a Wall-Mounted Fence.....                                                  | 353 |
| <i>Shishir Damani, Qihao Zhuo, Di Zhou, Meng Wang, Todd K. Lowe, William Devenport</i>                                                             |     |
| Experimental and Theoretical Investigation of Airfoil Noise Mitigation Using Biologically-Inspired Porosity.....                                   | 363 |
| <i>Mohammed M. Syed, Benjamin Schiffer, Anthony M. Lopez, John R. Kershner, Rozhin Hajian</i>                                                      |     |
| The Effects of Controlled Harmonic Morphing on a Porous Trailing Edge .....                                                                        | 375 |
| <i>Adolfo Herrera, Samik Bhattacharya, George Loubimov</i>                                                                                         |     |
| Acoustic and Flowfield Measurements of Rotor-Surface Interaction.....                                                                              | 392 |
| <i>Eduardo W. Rachid, Daniel R. Cuppoletti</i>                                                                                                     |     |
| Entropy Transport and Noise Generation Mechanism in Modern Aero-Engine Combustors.....                                                             | 407 |
| <i>Sudarshan Koushik, Duane McCormick, Jeffrey Mendoza</i>                                                                                         |     |
| Rotor Noise Reduction Using Beveled Trailing Edges and Hybrid RANS/LES Simulations.....                                                            | 418 |
| <i>Jordon Won, Seongkyu Lee</i>                                                                                                                    |     |
| Experimental Analysis of Rotor Noise and Interference Effects in a Dual-Rotor Configuration .....                                                  | 436 |
| <i>D. Garcia, R. Hörnschemeyer, E. Stumpf</i>                                                                                                      |     |
| Comparative Analysis of High and Mid-Fidelity Methods for Predicting Performance and Acoustics for UAM Applications .....                          | 451 |
| <i>Vadim Voropayev, Stanley Ossyra, Anastasios S. Lyrantzis, Reda R. Mankbadi, Vladimir V. Golubev, Sheryl Grace</i>                               |     |
| Aeroacoustic Validation of Flow360 for Joby's Five-Bladed eVTOL Propeller Using Scale-Resolving Simulations and NFAC Experiments.....              | 473 |
| <i>Payam Dehpanah, Qiqi Wang, Austin Thai, Jeremy Bain, Gregor V. Mikic</i>                                                                        |     |

Numerical Analysis of Broadband Noise in Propeller–Wing Configurations Using High-Fidelity Computational Fluid Dynamics ..... 492  
*Ethan Brown, Seongkyu Lee*

Aeroacoustics Simulations of Airframe Noise Using Cartesian-Grid-Based Compressible Flow Solver FFVHC-ACE ..... 510  
*Hiroyuki Asada, Soshi Kawai*

High-Fidelity Simulation and Analytical Modeling of Tip Vortex Turbulence for Interactional Aeroacoustic Predictions ..... 518  
*Sandip Ghimire, Sicheng K. Li*
