Volume 13825

Proceedings of SPIE, 1605-7422, V. 13825

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Imaging, Therapeutics, and Advanced Technology in Head and Neck Surgery and Otolaryngology 2026*, edited by Brian J. F. Wong, Justus F. Ilgner, Proc. of SPIE 13825, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TRANSLATIONAL OPTICAL TOOLS FOR EAR AND ORAL DIAGNOSTICS

13825 02 **Femtosecond laser in dentistry (Invited Paper)** [13825-1]

OPTICAL IMAGING AND FLUORESCENCE TECHNOLOGIES IN HEAD AND NECK CANCER II

13825 0A **Overview of cutaneous head and neck cancer using dynamic optical contrast imaging**
[13825-9]

OPTICAL AND PHOTONIC INNOVATIONS IN HEAD AND NECK CANCER: IMAGING THE TUMOR MICROENVIRONMENT, GUIDING SURGERY, AND ADVANCING PHOTODYNAMIC THERAPY I

13825 0C **Cyclic multiplexed immunofluorescence imaging of head and neck squamous cell carcinoma tumor microenvironment for improving immunotherapy response** [13825-11]

13825 0F **Translating dynamic optical contrast imaging (DOCI) for operating room integration**
[13825-14]

OPTICAL AND PHOTONIC INNOVATIONS IN HEAD AND NECK CANCER: IMAGING THE TUMOR MICROENVIRONMENT, GUIDING SURGERY, AND ADVANCING PHOTODYNAMIC THERAPY II

13825 0J **Effect of probe rotation and position on in vivo OCT imaging of the neonatal airway**
[13825-20]
