Volume 13829

Proceedings of SPIE, 1605-7422, V. 13829

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Diagnosis, Monitoring, Prevention, and Treatment of Infections and Inflammatory Diseases 2026*, edited by Tianhong Dai, Jürgen Popp, Mei X. Wu, Proc. of SPIE 13829, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTONIC DIAGNOSIS: KEYNOTE

- 13829 02 **Portable infrared and Raman spectroscopy for on-site detection of inflammatory markers in biofluids (Keynote Paper)** [13829-200]

PHOTONIC DIAGNOSIS I

- 13829 03 **Deep learning-enabled digital resolution molecular diagnostics in photonic resonator absorption microscopy** [13829-2]

PHOTONIC DIAGNOSIS II

- 13829 04 **Next-generation AMR diagnostics: probing bacterial responses with vibrational spectroscopy (Invited Paper)** [13829-5]
- 13829 05 **A label-free plasmonic biosensor for the detection of the rare autoinflammatory disease: familial Mediterranean fever** [13829-6]
- 13829 06 **Testosterone hormone sensing using 1D multilayer ZrO₂-SiO₂ photonic crystal** [13829-7]

PHOTONIC DIAGNOSIS III

- 13829 07 **Development of Raman spectroscopic techniques for presymptomatic diagnosis and disease prevention (Invited Paper)** [13829-8]
- 13829 08 **Ultrasensitive multiplexed immune profiling via plasmonic fluor enhanced assays** [13829-10]
- 13829 09 **Machine learning-enhanced LAMP-fluorescence assay for automated tuberculosis detection** [13829-12]

PHOTONIC PREVENTION AND TREATMENT I

- 13829 0A **Synergistic enhancement of photodynamic inactivation of pathogens using methylene blue, gold nanoparticles, and efflux pump inhibitors** [13829-14]

- 13829 0B **Growth phase-dependent tolerance to antimicrobial blue light in *Staphylococcus aureus* highlights roles for AbcA, reactive oxygen species, and endogenous porphyrin remodeling** [13829-35]

PHOTONIC PREVENTION AND TREATMENT II

- 13829 0C **In vitro evaluation of the photodynamic inactivation of *Rhizopus oryzae* (QPC Lasers – Hui Liu Best Student Paper Award)** [13829-20]
- 13829 0D **Different photodynamic inactivation responses of colistin-resistant bacteria** [13829-21]

PHOTONIC PREVENTION AND TREATMENT III

- 13829 0E **Resilience without resistance: gram-negative responses to antimicrobial blue light and stressors in clinical and food contexts (Invited Paper)** [13829-22]
- 13829 0F **Efficacy of low irradiance violet-blue light for the inactivation of attached and biofilm-associated bacteria on clinically-relevant materials** [13829-24]
- 13829 0G **Efficacy of cost-effective UV-light for *Salmonella* elimination** [13829-26]
- 13829 0H **Assessment of the antimicrobial efficacy and biocompatibility of far-UVC irradiation with whole blood** [13829-27]

POSTER SESSION

- 13829 0I **Development of a laser speckle imaging method for rapid and quantitative evaluation of antimicrobial effects** [13829-31]
- 13829 0J **Optical and computational profiling of neurodegenerative biomarkers in infectious and inflammatory contexts** [13829-33]
- 13829 0K **Enhanced bacterial inactivation by pulsed UVC light is accompanied by increased thymine dimer formation** [13829-34]
