SPIE

Volume 13830

Proceedings of SPIE, 1605-7422, V. 13830

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic Therapy XXXIV*, edited by Tayyaba Hasan, Edward V. Maytin, David H. Kessel, Proc. of SPIE 13830, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

IN VIVO/IN VITRO MODELING OF PDT RESPONSES

- 13830 02 **Modeling micro-invasion of 3D head and neck carcinoma and efficacy of ALA-PDT**
[13830-3]

PDT DOSIMETRY I

- 13830 03 **Image-guided PDT for oral lesions: technology development, evaluation, and translation**
[13830-5]
- 13830 04 **Refining photochemical dose–response modeling in single-fraction Photofrin-PDT using [ROS]_x and MSOLD correlation** [13830-7]

NEW PDT DIAGNOSTICS AND THERAPEUTICS

- 13830 05 **Design and characterization of LED-based illuminators for oral cancer photodynamic therapy** [13830-8]
- 13830 06 **Cherenkov-excited luminescence imaging using injectable tattoo ink combined with liquid fiducial markers for in vivo radiation beam tracking during radiotherapy** [13830-9]
- 13830 07 **Diagnostics and therapeutics strategies in ALA-PDT by multiphoton excitation using a NIR ultrafast pulse laser source** [13830-10]

PDT DOSIMETRY II

- 13830 08 **Compact and portable device for monitoring cutaneous photosensitivity after photodynamic therapy** [13830-12]
- 13830 09 **Multispectral singlet oxygen luminescence dosimetry (MSOLD) for direct singlet oxygen monitoring during in-vivo benzoporphyrin derivative (BPD) mediated photodynamic therapy (PDT)** [13830-13]
- 13830 0A **Optical coefficient measurement of spinal cord tissue and numerical simulation for interstitial photodynamic therapy** [13830-14]

GENETICS, METASTASIS AND TREATMENT RESISTANCE

13830 0B **Real-time reactive oxygen species dosimetry for pleural photodynamic therapy** [13830-23]

PDT DOSIMETRY III

13830 0C **Time-resolved singlet oxygen luminescence detection in rose bengal phantoms: influence of concentration and scattering** [13830-24]

13830 0D **Integrated three-dimensional deformable image registration and reactive oxygen species modeling for pleural photodynamic therapy** [13830-25]

13830 0E **Optimizing excitation wavelength for enhanced singlet oxygen generation with benzoporphyrin derivatives in photodynamic therapy** [13830-26]

POSTER SESSION

13830 0F **Development of research-use in vivo fluorescence imaging systems for real-time observation of drug responses during photoirradiation and for monitoring drug accumulation before and after photoirradiation in photodynamic therapy or photoimmunotherapy** [13830-28]
