**Volume 13831**

Proceedings of SPIE, 1605-7422, V. 13831

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ophthalmic Technologies XXXVI*, edited by Daniel X. Hammer, Derek Nankivil, Yuankai K. Tao, Proc. of SPIE 13831, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Conference Committee*

---

## **INTRAOPERATIVE, MICROSCOPE INTEGRATED, HANDHELD, AND ROBOTIC SYSTEMS**

---

13831 03 **Non-mydratic handheld panretinal OCT imaging with custom optics** [13831-8]

---

## **PASCAL ROL KEYNOTE ADDRESS**

---

13831 04 **Adaptive optics imaging in retinal disease: from (optical) bench to bedside (Keynote Paper)** [13831-200]

---

## **NOVEL ANGIOGRAPHY AND FLOWMETRY**

---

13831 05 **Quantitative analysis of venous flow distribution and pulsatile near arteriovenous crossings assessed by Doppler OCT flowmetry** [13831-9]

13831 06 **Examining retinal blood flow using a fast, line scanning adaptive optics ophthalmoscope** [13831-11]

---

## **NOVEL THERAPIES, VISION RESTORATION/CORRECTION, AND NEURO-OPHTHALMOLOGY**

---

13831 07 **Binocular simulator of ophthalmic corrections with accommodation monitoring and convergence control** [13831-22]

13831 08 **Non-invasive photoacoustic contact lens for sight restoration** [13831-24]

13831 09 **Revealing neurovascular coupling at a high spatial and temporal resolution in the living human retina** [13831-26]

---

## **ANTERIOR SEGMENT IMAGING AND TECHNOLOGIES**

---

13831 0A **Circumferential mapping of human limbal vasculature and aqueous outflow pathways based on circular-scan anterior-segment optical coherence tomography** [13831-32]

13831 0B **100+ patients of corneal transmission interferometric microscopy** [13831-33]

---

#### NOVEL DEVICES AND METHODOLOGY

---

- 13831 OC **Despeckling via rapid sub-B-scan registration in wavefront-sensorless adaptive-optics optical coherence tomography** [13831-35]
- 13831 OD **Closed-loop regulation of subretinal blebs via OCT speckle dynamics tracking** [13831-36]
- 13831 OE **Volumetric fluorescent imaging of in vivo single retinal cells using lightfield scanning laser ophthalmoscopy (LF-SLO) with computational aberration corrected depth sectioning (Pascal Rol Award)** [13831-40]

---

#### FUNCTIONAL METHODS AND OPTORETINOGRAPHY

---

- 13831 OF **In vivo spatially-targeted retinal stimulation enabled by closed-loop focus adjustment** [13831-41]
- 13831 OG **Reversible isomerization of rhodopsin imaged in-vivo with phase-sensitive OCT** [13831-45]
- 13831 OH **Wide-field cellular optoretinography by time-domain full-field OCT** [13831-46]

---

#### MACHINE LEARNING AND COMPUTATIONAL METHODS

---

- 13831 OI **Stereo-vision-inspired deep learning for inferring choroidal tumor thickness from 2D fundus images** [13831-47]
- 13831 OJ **Network-based OCT reconstruction from gapped spectra with complementary noise reduction** [13831-49]

---

#### POSTER SESSION

---

- 13831 OK **Applying multimodal fusion and pretraining enhancements to improve diagnostic accuracy of multiple eye diseases from fundus images** [13831-54]
- 13831 OL **OCT to OCTA translation using Brownian bridge diffusion model** [13831-56]
- 13831 OM **Anatomically guided vision-language model for efficient OCT disease classification and reporting** [13831-57]
- 13831 ON **Sequential deep learning for predicting geographic atrophy progression from OCT imaging** [13831-60]
- 13831 OO **Investigations of multimodal imaging in radiofrequency ablation of ciliary body for glaucoma treatment** [13831-61]

- 13831 OP **Low-cost eye refraction via AI image-space wavefront sensing** [13831-62]
- 13831 OQ **Design and fabrication of contact lenses with composite microlens arrays and metasurfaces for myopia control** [13831-64]
- 13831 OR **OCT characterization of progressive retinal degeneration in a USH2A knockout rabbit model** [13831-71]
- 13831 OS **FedSim: foundational federated multi-task learning for ophthalmic diagnostics** [13831-74]
- 13831 OT **GlaucomaVLM : a domain-specific vision-language model for glaucoma** [13831-76]
- 13831 OU **Optical modeling of focal-point divergence between surgical Nd:YAG and aiming lasers** [13831-77]
- 13831 OV **Enhancing ophthalmic surgical visibility under low dye staining by spectral characteristics optimized imaging** [13831-80]
- 13831 OW **Quantitative transparency mapping device for corneal tissues assessment** [13831-81]
- 13831 OX **Long-term stability assessment of an OCT angiography model eye using Brownian motion contrast without flowing liquids** [13831-84]
