Volume 13832

Proceedings of SPIE, 1605-7422, V. 13832

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Molecular-Guided Surgery: Molecules, Devices, and Applications XIII*, edited by Summer L. Gibbs, Kenneth M. Tichauer, Proc. of SPIE 13832, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

THERANOSTICS

- 13832 02 **Quantitative evaluation of individual fluorophore and paired agent imaging performance for glioma visualization** [13832-6]

ENDOSCOPY

- 13832 03 **cCell: 2nd-generation confocal laser endomicroscopy platform for molecular-guided surgery** [13832-12]

STANDARDIZATION AND QUANTIFICATION

- 13832 04 **Standardization and quantification of skin tone measurements for patient-centered, optics-based biomedical devices (Invited Paper)** [13832-25]
- 13832 05 **Performance assessment and quality control in fluorescence molecular imaging (Invited Paper)** [13832-26]
- 13832 06 **Implementation of a prospective, multi-center clinical study of dynamic contrast fluorescence imaging to diagnose necrotizing soft-tissue infection: challenges and lessons learned (Invited Paper)** [13832-27]
- 13832 07 **A case for contrast-to-variability ratio over tumor-to-background ratio for evaluating detectability in fluorescence molecular imaging** [13832-29]

FLUORESCENCE DEPTH

- 13832 08 **Mesosopic fluorescence imaging of light triggered chemotherapeutic release in a cancer spheroid model** [13832-70]
- 13832 09 **Depth-resolved fluorescence via ratiometric imaging in NIR-I and NIR-II** [13832-34]
- 13832 0A **Optimization of a dual aperture fluorescence ratio (dAFR) imaging system for quantifying fluorescence depth at surgical margins** [13832-35]

CLINICAL APPLICATIONS II

- 13832 0B **Next-generation multifunctional imaging tools for precision surgical oncology (Invited Paper)** [13832-43]

TRANSLATIONAL FLUORESCENCE LIFETIME-BASED MOLECULAR IMAGING I

- 13832 0C **High-spatial-frequency structured illumination enhances fluorescence lifetime specificity in scattering media** [13832-47]
- 13832 0D **Fluorescence lifetime FRET imaging reveals spatial heterogeneity of antibody-HER2 engagement in breast cancer models** [13832-49]
- 13832 0E **Fluorescence lifetime imaging of cRGD-ZW800 in human pancreatic cancer** [13832-50]

TRANSLATIONAL FLUORESCENCE LIFETIME-BASED MOLECULAR IMAGING II

- 13832 0F **Concurrent monitoring of antibody delivery and metabolic responses through a multimodal FLI platform** [13832-56]

POSTER SESSION

- 13832 0G **Evaluation of a novel peripheral nerve-binding contrast agent using high-resolution fluorescence cryotomography in rats** [13832-58]
- 13832 0H **A single-shot SPAD-based center-of-mass fluorescence lifetime imaging system for real-time surgical applications** [13832-59]
- 13832 0I **Improving the real-time depth estimation of normal critical structures in biological tissues assisted by fluorescence ratiometric analysis** [13832-62]
- 13832 0J **Visualization platform for margin assessment in head and neck cancer fluorescence-guided surgery** [13832-68]
- 13832 0K **Optical property characterization using multi-frequency laparoscopic SFDI** [13832-69]
