SPIE

**Volume 13837**

Proceedings of SPIE, 1605-7422, V. 13837

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Coherence Tomography and Coherence Domain Optical Methods in Biomedicine XXX*, edited by Rainer A. Leitgeb, Yoshiaki Yasuno, Proc. of SPIE 13837, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## STRUCTURAL AND FUNCTIONAL RETINAL IMAGING

---

- 13837 02 **Dark adaptation of cone responses and inter-subject variability measured using adaptive optics OCT optoretinography (Invited Paper)** [13837-1]
- 13837 03 **Full-field swept source optical coherence tomography for structural and functional retinal imaging in mice** [13837-2]

---

## DYNAMIC CONTRAST OCT I

---

- 13837 04 **Quantitative and multidynamics optical coherence tomography for assessing intratissue activities of in vitro samples** [13837-11]

---

## ANTERIOR SEGMENT IMAGING

---

- 13837 05 **Circumferential imaging of limbal vascular network in human eyes using circular-scan anterior-segment optical coherence tomography** [13837-13]
- 13837 06 **Assessment of in vivo corneal biomechanical properties using noncontact reverberant optical coherence elastography** [13837-14]
- 13837 07 **Integration of real-time refractive correction into a long-range OCT system for full-eye biometric measurement** [13837-17]

---

## TRANSLATIONAL IMAGING

---

- 13837 09 **Advancing endometrial cancer diagnosis through optical biopsy: novel minimally invasive approach** [13837-25]

---

## POLARIZATION SENSITIVE OCT II

---

- 13837 0A **Quantitative analysis of in vivo imaging characteristics of mice with polarization-diversity OCT** [13837-36]
- 13837 0B **Refined validation of aortic valve pathology and pericardium replacement using polarization-sensitive OCT** [13837-39]

---

## NEW TECHNOLOGY II

---

- 13837 OC **Fully automated large-area OCT scanning procedure for a combined OCT-Raman system** [13837-57]

---

## SIGNAL AND IMAGE PROCESSING

---

- 13837 OD **Learned differentiable Poisson reconstruction enables 4D intraoperative OCT on low-speed systems** [13837-59]

---

## PRECLINICAL IMAGING

---

- 13837 OE **100-degree non-contact visible-light OCT and SLO for in vivo mouse retinal imaging** [13837-65]
- 13837 OF **Assessing the effects of prenatal cannabinoid consumption on fetal brain vasculature utilizing optical coherence tomography angiography** [13837-67]

---

## POSTER SESSION

---

- 13837 OG **Multimodal imaging-based quantitative assessment of retinal inflammation and function in experimental autoimmune uveitis** [13837-71]
- 13837 OH **Measuring the speckle variance profile using optical coherence tomography angiography** [13837-72]
- 13837 OI **High-speed adaptive optics swept-source full-field OCT** [13837-73]
- 13837 OJ **Piezo-free full-field OCT imaging of static biological samples** [13837-75]
- 13837 OK **Comprehensive in vivo ultrastructural, morphological, and functional imaging of whole zebrafish using optical coherence tomography (Best Poster Award)** [13837-77]
- 13837 OL **Automatic imaging of multiple spheroids by synchronous control of linear sample stage and dynamic OCT instrument (Best Poster Award)** [13837-78]
- 13837 OM **Toward fully automatic image-based longitudinal analysis of large number of spheroids by dynamic optical coherence tomography: step-1 robust and fully automatic segmentation** [13837-81]
- 13837 ON **Towards quantitative demineralization analyses in dental PS-OCT based on bovine enamel investigations** [13837-82]
- 13837 OO **Low-cost real-time inference for semantic segmentation of optical coherence tomography data** [13837-85]
