SPIE

**Volume 13840**

Proceedings of SPIE, 1605-7422, V. 13840

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Design and Quality for Biomedical Technologies XIX*, edited by Gracie Vargas, Proc. of SPIE 13840, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## HEMODYNAMIC PHANTOMS FOR OXIMETRY AND SENSING

---

- 13840 02 **Fabrication of SLA-printed pulsatile phantoms with epidermal melanin layers for wearable photoplethysmography device testing with U-shaped vasculature microchannels** [13840-2]
- 13840 03 **Evaluating the effect of skin color on photoplethysmography signals in a vascular finger phantom** [13840-5]

---

## STANDARDIZED QUANTITATION OF EPIDERMAL MELANIN IMPACTS I

---

- 13840 04 **Tunable melanin-mimicking polyurethane films for evaluating the accuracy of quantitative diffuse optical spectroscopy** [13840-8]
- 13840 05 **Evaluating the effect of skin tone on quantitative hybrid frequency-domain and broadband diffuse optical spectroscopy** [13840-9]

---

## OBJECTIVE ASSESSMENT OF NOVEL BIO-IMAGING MODALITIES

---

- 13840 06 **A standardized data specification for reproducible, verifiable structured light and multispectral image sets** [13840-15]
- 13840 07 **Design of lipid emulsion-dye phantoms for validation of optical imaging systems** [13840-17]

---

## STANDARDIZED QUANTITATION OF EPIDERMAL MELANIN IMPACTS II

---

- 13840 08 **Gelatin-based tissue-simulating skin phantom for the optimization of enhanced thermal imaging (ETI)** [13840-12]

---

## FLUORESCENCE IMAGING QUALITY AND DESIGN II

---

- 13840 09 **Correlating final system performance metrics with design metrics of optical imaging systems in biomedical devices** [13840-25]
- 13840 0A **Influence of external contact pressure in reflection mode photoplethysmography: a multidimensional manufacturing approach** [13840-26]
