**Volume 13845**

Proceedings of SPIE, 1605-7422, V. 13845

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biophotonics in Exercise Science, Sports Medicine, Health Monitoring Technologies, and Wearables VII*, edited by Babak Shadgan, Amir H. Gandjbakhche, Proc. of SPIE 13845, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## OPTICS IN EXERCISE MONITORING

---

13845 02 **A 192-channel wearable fNIRS patch to monitor changes in tissue oxygen saturation during exercise** [13845-6]

---

## OPTICAL DIAGNOSTICS

---

13845 03 **Noninvasive diagnosis of chronic exertional compartment syndrome using near-infrared spectroscopy: assessing tissue oxygenation dynamics** [13845-9]

13845 04 **Assessing the efficacy of near-infrared imaging for evaluation of intraoperative flap oxygenation in hypospadias reconstructive surgeries** [13845-11]

13845 05 **Smart sensing in Oura Ring 4: advancing personalized health monitoring through adaptive sensor technology** [13845-13]

13845 06 **Neurobiological markers of cognitive behavioral therapy response in youth with irritability using functional near infrared spectroscopy: a pilot study** [13845-22]

---

## OPTICAL MONITORING SYSTEMS

---

13845 07 **Customized in-ear PPG sensor (Best Paper Award 3rd Place)** [13845-14]

13845 08 **Harmonic ratio map from non-contact photoplethysmography for arterial stiffness assessment** [13845-16]

---

## OPTICAL MONITORING METHODS

---

13845 09 **Simulation-based estimation of tissue oxygen saturation using Monte Carlo modeling and AI: a preclinical validation approach** [13845-21]

**POSTER SESSION**

---

- 13845 0A **Optical sensor for seizure detection** [13845-25]
- 13845 0B **Wearable sensor-based device data and machine learning predictive tool for body-focused repetitive behaviors** [13845-23]
- 13845 0C **A deep learning framework for real-time tissue perfusion monitoring using near-infrared spectroscopy** [13845-20]
