Volume 13849

Proceedings of SPIE, 1605-7422, V. 13849

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Interactions with Tissue and Cells XXXVII*, edited by Joel N. Bixler, Alex J. Walsh, Norbert Linz, Proc. of SPIE 13849, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTOTHERMAL, PHOTOCHEMICAL, PHOTO-OXIDATIVE, AND PHOTOMECHANICAL INTERACTIONS

- 13849 02 **New generation endo-cap approach for well-confined and angle-controlled laser coagulation of esophageal mucosa and submucosa layers** [13849-1]
- 13849 03 **Experimental evaluation of thermal effect of circumferentially emitted laser in an in-vivo rabbit esophageal model** [13849-2]
- 13849 04 **A home-built flexible fiber laser to investigate optimal parameters for stimulating the tympanic membrane** [13849-4]

OPTICAL PROPERTIES OF TISSUES AND CELLS

- 13849 05 **Bootstrapping and sensitivity analysis for robust recovery of optical coefficients using time domain diffusion theory from bilayered media** [13849-6]
- 13849 06 **Optical and thermal modeling of human tissue laser ablation** [13849-8]
- 13849 07 **Optical spectroscopic analysis of biochemical changes using infrared spectral discrimination of transgenic mice serum to study the potential correlation of the nanostructural disorder alterations for neurological diseases** [13849-5]

NOVEL IMAGING METHODS TO VISUALIZING OPTICAL INTERACTIONS WITH TISSUES AND CELLS I

- 13849 08 **Comparing label-free and fluorescent indicators for sensitivity to pulsed electric field-induced cell damage** [13849-12]

NOVEL IMAGING METHODS TO VISUALIZING OPTICAL INTERACTIONS WITH TISSUES AND CELLS II

- 13849 09 **Discriminating breast cancer risk through Shannon entropy and informational parameters extracted from optical FEDSA signals** [13849-17]

ADVANCED NUMERICAL METHODS FOR MODELING LIGHT TISSUE INTERACTION

- 13849 0A **Overcoming thermal constraints in two-photon imaging using thermoelectric cooling**
[13849-19]
- 13849 0B **Optimizing spatially offset Raman spectroscopy designs: balancing signal and safety for biomedical applications** [13849-20]
- 13849 0C **Residual Fourier operator networks for real-time bioheat transfer modeling with parametric laser sources** [13849-21]

ULTRAFAST LASER PHENOMENA IN CELLS AND TISSUE

- 13849 0D **Laser-induced inertial cavitation in anisotropic soft biological materials (Invited Paper)**
[13849-22]
- 13849 0E **Toward high-speed ultrafast laser surgery: optimizing bone ablation performance in miniaturized systems** [13849-23]
- 13849 0F **Modulation of energy thresholds for laser-induced cavitation using gold nanoparticles**
[13849-24]

SUNDAY POSTER SESSION

- 13849 0G **OCT-based structural and functional assessment of cardiac organoids derived from hiPSCs**
[13849-31]
- 13849 0H **Measuring how scattering anisotropy changes with tissue thickness using rapid characterization via imaging sensors** [13849-32]

MONDAY POSTER SESSION

- 13849 0I **Advancing histology with LED-based evanescent field illumination technique** [13849-33]
