Volume 13857

Proceedings of SPIE, 1605-7422, V. 13857

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Three-Dimensional and Multidimensional Microscopy: Image Acquisition and Processing XXXIII*, edited by Thomas G. Brown, Tony Wilson, Laura Waller, Proc. of SPIE 13857, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MULTIDIMENSIONAL IMAGE RECONSTRUCTION AND ANALYSIS

- 13857 02 **Refractive index reconstruction using optical diffraction tomography algorithms based on single-scattering and multiple-scattering models** [13857-1]
- 13857 03 **3-D virtual fluorescence and H&E staining of fresh thick tissue via qOBM and conditional GAN** [13857-2]
- 13857 04 **Edge-enhanced 3D attention U-Net for accurate brain tumor delineation and classification in magnetic resonance imaging** [13857-4]

HOLOGRAPHIC AND PHASE SENSITIVE IMAGING

- 13857 05 **Label-free analysis of living cell cultures at the single cell level utilizing artificial neural network supported simultaneous bright field and off-axis digital holographic microscopy** [13857-6]
- 13857 06 **TomoTweezers: limited-angle holographic tomography realized with optical tweezers** [13857-7]
- 13857 07 **Adaptive phase retrieval refinement for fast and accurate TIE-based quantitative phase imaging** [13857-8]

INSTRUMENTATION AND METHODS I

- 13857 08 **On-glass interference confocal reflectance microscopy for collagen fibril diameter measurement** [13857-9]
- 13857 09 **Combined excitation scan-based hyperspectral imaging and digital deconvolution for the assessment of the kinetic and spatial distributions of cAMP signals** [13857-12]

INNOVATIONS IN MICROSCOPE DESIGN

- 13857 0A **System components for laser-free confocal microscopy** [13857-14]
- 13857 0B **Bioinspired compound imager for foveated light-field imaging** [13857-16]

COMPUTATIONAL IMAGING

- 13857 0C **Cellular fluorescence microscopy aberration correction with focus-diverse machine learning** [13857-17]
- 13857 0D **Wide-field high-resolution microscopy via high-speed galvo scanning and real-time mosaicking** [13857-18]
- 13857 0E **Optimized module for hyperspectral acquisition in single-pixel microscopy** [13857-20]

INSTRUMENTATION AND METHODS II

- 13857 0F **Optimised imaging strategy for three-photon functional neural imaging** [13857-21]
- 13857 0G **A deep UV Fourier ptychographic microscope for microstructural characterization** [13857-23]
- 13857 0H **Large-volume high-resolution 3D Raman hyperspectral imaging of diamond** [13857-24]
- 13857 0I **Amplitude and phase controlled photonic chip for dual-color structured illumination microscopy, HiLo microscopy, and profilometry** [13857-25]

EXTENDED DEPTH-OF-FOCUS AND LIGHT SHEET MICROSCOPY

- 13857 0J **Rapid depth-integrated superresolution imaging for digital pathology** [13857-26]
- 13857 0K **Four-dimensional image formation theory of high-NA full-field optical coherence tomography** [13857-28]
