Volume 13863

Proceedings of SPIE, 1605-7422, V. 13863

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Label-free Biomedical Imaging and Sensing (LBIS) 2026*, edited by Natan T. Shaked, Oliver Hayden, Proc. of SPIE 13863, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OCT

- 13863 02 **Polarization-resolved microscopy for label-free stress-induced birefringence mapping in anisotropic organoids** [13863-57]

BIOSENSORS I

- 13863 03 **DNA origami capture and tethering of intact viruses and label-free digital detection by photonic-crystal-enhanced scattering microscopy (Keynote Paper)** [13863-6]
- 13863 04 **High spatial resolution phase-OFDR with novel polarization-stabilized configuration for distributed monitoring of environmental parameters relevant to bio-analyte interactions** [13863-8]

SPECTROSCOPY

- 13863 05 **AI-assisted gastric cancer diagnosis using a multimodal hyperspectral imaging system** [13863-15]
- 13863 06 **Multispectral quantitative epi-illumination deep-ultraviolet imaging with pseudo-colorization for fresh tissues** [13863-16]
- 13863 07 **Multispectral optical imaging system for inclusive, label free dermatological skin diagnostics** [13863-17]

BIOSENSORS II

- 13863 08 **Single-mode all-fiber label-free biosensors based on quasi-random optical structures: from design to in-situ sensing applications (Keynote Paper)** [13863-24]
- 13863 09 **Design optimization of label-free silicon-microring-based PS-CRDS absorption sensor** [13863-25]
- 13863 0A **Lensless excitation of whispering gallery modes for label-free detection of malaria** [13863-27]

RAMAN I

- 13863 0B **Raman spectroscopic detection of fentanyl-induced neuroinflammation** [13863-29]
- 13863 0C **Label-free detection of elastin in tissue-engineered constructs using Raman spectroscopy** [13863-30]

HOLOGRAPHY AND PHASE IMAGING II

- 13863 0D **Deep learning for label-free characterization of nanoscale particles in interferometric microscopy** [13863-47]

PHOTOACOUSTICS, POLARIZATION AND SCATTERING

- 13863 0E **QUILPEN decouples pigment absorption and organelle scatter in live melanocytic cells** [13863-60]
- 13863 0F **Experimental demonstration of imaging hidden targets in turbid media using single-shot multiview images with advanced image processing** [13863-68]
- 13863 0G **Depth-aware deconvolution framework for physics-informed Monte Carlo deblurring in optical resolution photoacoustic microscopy** [13863-61]

POSTER SESSION

- 13863 0H **Intracellular compartment analysis of eosinophilic diseases using AI-assisted Raman spectral profiling** [13863-62]
- 13863 0I **Algorithm comparison for oxygen saturation estimation in whole blood using diffuse reflectance hyperspectral imaging** [13863-63]
- 13863 0J **Brillouin spectroscopy for assessing frozen beef microstructure** [13863-64]
- 13863 0K **GPU-improved volumetric mosaic and quantitative photoacoustic microscopy for longitudinal tumor growth observation** [13863-66]
- 13863 0L **Monitoring treatment response using a combination of multi-functional tunable wavelength photoacoustic microscopy and electrocardiography** [13863-67]
