SPIE

Volume 13866

Proceedings of SPIE, 1605-7422, V. 13866

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Endoscopic Microscopy XXI*, edited by Guillermo J. Tearney, Thomas D. Wang, Melissa J. Suter, Proc. of SPIE 13866, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MICROSYSTEMS IN BIOMEDICAL IMAGING

- 13866 02 **Enhanced numerical aperture in a multimode fibre via a distal Fresnel zone plate for high-resolution endoscopic imaging** [13866-2]

FLUORESCENCE ENDOSCOPIC MICROSCOPY

- 13866 03 **Development of a wireless micro-endoscopic device for real-time in-vivo point-of-care detection of oral and skin cancers** [13866-10]
- 13866 04 **Label-free histopathological imaging using bendable graded index lens two-photon and second-harmonic microendoscopy** [13866-13]

NOVEL ENDOSCOPIC SYSTEM DEVELOPMENT

- 13866 05 **Label-free, real-time phase imaging with chip-on-tip qOBM microendoscope** [13866-16]
- 13866 06 **Extending the depth of focus to centimeter scale in endoscopic OCT** [13866-15]
- 13866 07 **Depth-enabled fiber-bundle endoscopy for in-situ intraluminal robotic navigation** [13866-17]

INNOVATIVE CATHETER DESIGNS I

- 13866 08 **Meta-element-enhanced confocal scanning fiber fluorescence endoscopy optical system** [13866-18]
