SPIE

Volume 13868

Proceedings of SPIE, 1605-7422, V. 13868

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Colloidal Nanoparticles for Biomedical Applications XXI*, edited by Yadong Yin, Antonios G. Kanaras, Proc. of SPIE 13868, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NANOMATERIALS IN BIOMEDICAL APPLICATIONS I

- 13868 02 **Improving upconversion nanoparticle's quantum yield in depth by using pulsed excitation**
[13868-36]
- 13868 03 **Metal-based nanoparticles as antibacterial agents (Invited Paper)** [13868-2]
- 13868 04 **Optimization of inhalable nanomedicines through the use of multifunctional nanoparticles (Invited Paper)** [13868-3]

NANOMATERIALS IN BIOMEDICAL APPLICATIONS II

- 13868 05 **Engineered elongated inorganic nanoparticles for biomedical applications (Invited Paper)**
[13868-5]

NANOMATERIALS IN BIOMEDICAL APPLICATIONS III

- 13868 06 **Multifunctional biosilica nanoparticles for medicine (Invited Paper)** [13868-9]
- 13868 07 **New possibilities of metal clusters for bio-applications (Invited Paper)** [13868-10]

BIOIMAGING WITH NANOMATERIALS I

- 13868 08 **Cell membrane delivery of compact voltage-sensitive spherical quantum well nanocrystals for neuronal voltage imaging (Invited Paper)** [13868-14]

BIODETECTION WITH NANOMATERIALS I

- 13868 09 **Plasmonic-photonic interfaces in biodetection: from nanoparticles to nano-assemblies**
[13868-22]

BIODETECTION WITH NANOMATERIALS II

- 13868 0A **Surface-enhanced Raman spectroscopy and machine learning for the classification of p53 protein** [13868-26]

NANOMATERIALS

- 13868 0B **Synthesis and characterization of Er³⁺-doped LiYF₄/LiYF₄ core/shell colloidal nanoparticles for biomedical imaging applications (Invited Paper) [13868-27]**
- 13868 0C **Multi-azide polyoxazoline-coated gold nanoparticles for biomedical applications [13868-28]**
- 13868 0D **Elementary charge characterization of quantum dots in solution using laser scanning microscopy [13868-30]**

POSTER SESSION

- 13868 0E **Fabrication of a scalable, reproducible, large-area, highly efficient SERS substrate for heavy metal detection in water [13868-34]**
