SPIE

Volume 13869

Proceedings of SPIE, 1605-7422, V. 13869

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Plasmonics in Biology and Medicine XXIII*, edited by Tuan Vo-Dinh, Ho-Pui A. Ho, Krishanu Ray, Proc. of SPIE 13869, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SURFACE-ENHANCED RAMAN SCATTERING II

13869 02 **Direct SERS detection of mRNA cancer biomarkers using spikey nanorattle biosensors**
[13869-7]

PLASMONIC SENSING SYSTEMS I

13869 03 **Imaging the rotational mobility of fluorophore by time-resolved fluorescence anisotropy**
[13869-10]

13869 04 **High-throughput plasmonic functional assay platform for rapid therapeutic profiling of cancer cells** [13869-12]

13869 05 **Label-free metabolic imaging of microbial infections by two-photon fluorescence lifetime imaging microscopy** [13869-13]

ADVANCED SENSING SYSTEMS AND PLASMONICS APPLICATIONS

13869 06 **Shifted excitation Raman difference spectroscopy: a key tool for real-world applications (Invited Paper)** [13869-18]

13869 07 **Optical fibre refractive index sensor modified with ultra-thin gold nanodisc metasurface**
[13869-23]

POSTER SESSION

13869 08 **Scalable, high-sensitivity SERS substrates based on lithographically engineered nanostructures** [13869-1]

13869 09 **Bioconjugation of plasmonic nanoparticles for point-of-care diagnostics** [13869-24]

13869 0A **Spectrometers with prism-type excitation of surface plasmon resonance: ways to increase efficiency** [13869-25]
