**Volume 13870**

Proceedings of SPIE, 1605-7422, V. 13870

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Frontiers in Biological Detection: From Nanosensors to Systems XVIII*, edited by Amos Danielli, Benjamin L. Miller, Andrea K. Locke, Proc. of SPIE 13870, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## COLORIMETRIC AND FLUOROMETRIC SENSOR ARRAYS

---

- 13870 02 **Optical chemosensor arrays for taste components (Invited Paper)** [13870-1]
- 13870 03 **Optical sensors and arrays: development strategies and applications for environmental monitoring (Invited Paper)** [13870-2]

---

## SERS AND SPR I

---

- 13870 04 **SERS and microfluidics: synergy for chemical sensing (Invited Paper)** [13870-4]
- 13870 05 **AI-assisted extraction and quantification of viral RNA SERS spectra from DNA-RNA hybridization measurement** [13870-5]

---

## SILICON PHOTONICS

---

- 13870 06 **Multichromatic illumination for smartphone biosensing using porous silicon rugate filters: role of width and spectral position of illumination peaks** [13870-8]
- 13870 07 **A dual-readout photonic sensor for simultaneous measurement of enzyme activity and concentration** [13870-11]

---

## OTHER INNOVATIVE SENSORS I

---

- 13870 08 **Integrated fiber optic platform combining FBG and small-period LPG for accurate refractive index sensing and fPSA detection (Invited Paper)** [13870-14]

---

## SERS AND SPR II

---

- 13870 09 **Label-free metal ion imaging using surface plasmon resonance microscopy (Invited Paper)** [13870-17]

---

#### **FLUORESCENCE AND LUMINESCENCE I**

---

- 13870 0A **Proof of concept for detecting buried landmines by bacterial chemical sensing (Invited Paper)** [13870-21]
- 13870 0B **Chemical sensing employing bioluminescent bacteria for water supply systems** [13870-23]

---

#### **OTHER INNOVATIVE SENSORS II**

---

- 13870 0C **Fluorescence labeling of cancer cells with chemically modified bacteria (Invited Paper)** [13870-24]

---

#### **DIGITAL POSTER SESSION**

---

- 13870 0D **Label-free detection of alanine aminotransferase with liquid crystal microcavities** [13870-12]
