**Volume 13871**

Proceedings of SPIE, 1605-7422, V. 13871

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Reporters, Contrast Agents, and Molecular Probes for Biomedical Applications XVII*, edited by Mikhail Y. Berezin, Ramesh Raghavachari, Proc. of SPIE 13871, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ADVANCED IMAGING PROBES

---

- 13871 03 **Unsymmetrical heptamethine cyanines prevent aggregation (Invited Paper)** [13871-5]
- 13871 04 **Widely available imaging-device-compatible NIR dyes for tumor visualization (Invited Paper)** [13871-6]

---

## NOVEL IMAGING STRATEGIES

---

- 13871 05 **A DNA aptamer platform for target-responsive photoacoustic sensing via ICG assembly** [13871-11]
- 13871 06 **Multimodal sensing of biological microenvironment using aggregation-induced emission fluorophores** [13871-12]

---

## IMAGING IN VITRO AND IN VIVO

---

- 13871 07 **A new kidney function assessment system utilizing a novel optical agent and its transdermal detection approved by the FDA (Invited Paper)** [13871-14]
- 13871 08 **Methionine-driven redox and macromolecular turnover reprogramming in TDP-43-expressing cells imaged by DO-SRS and 2PEF** [13871-23]

---

## SPECTROSCOPY AND IMAGING

---

- 13871 09 **Synergy in action: advancing multimodal, label-free deep tissue optical imaging (Invited Paper)** [13871-16]
- 13871 0A **AI-enhanced fluorescence spectroscopy for predictive biomarker detection in personalized medicine** [13871-17]
