Volume 13873

Proceedings of SPIE 0277-786X, V. 13873

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Solid State Lasers XXXV: Technology and Devices*, edited by W. Andrew Clarkson, Ramesh K. Shori, Proc. of SPIE 13873, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

EYE-SAFE AND MID-IR LASERS

- 13873 02 **Investigations towards nonplanar Ho³⁺:YAG ring resonator designs** [13873-2]
- 13873 03 **High-energy Tm:YLF laser passively Q-switched utilizing Ho:YAG crystal** [13873-3]
- 13873 04 **High repetition rate at 120Hz, high pulse energy with 2mJ, passive Q-switched compacted laser transmitter at 1.54 μ m** [13873-5]

PULSED, AIRBORNE, AND SPACE QUALIFIED LASERS

- 13873 05 **A compact lidar spectrometer for lunar surface science and in situ resource utilization** [13873-7]
- 13873 06 **Single frequency, narrow linewidth 935nm laser source for high-altitude water vapor LIDAR** [13873-8]
- 13873 07 **Few-nanosecond gain-switched Ho:YAG and Ho:YAP lasers** [13873-4]

ULTRAFAST LASERS

- 13873 08 **Efficient above-mJ 62fs OPCPA at 3.2 μ m for soft x-ray generation up to 1keV** [13873-12]

NOVEL LASER MATERIALS, CHARACTERIZATION, AND CONCEPTS

- 13873 09 **Bonding interface analysis and thermal properties of Cr:LiSAF/sapphire composite chips** [13873-17]
- 13873 0A **A platform for compact diode-pumped visible lasers: waveguides in rare earth doped fluorides** [13873-20]
- 13873 0B **Manufacture of multilayered zero-order AFB compound waveplates with in-process retardation measurement** [13873-21]
- 13873 0C **A highly efficient downconverter from Er³⁺, Yb³⁺, and Ce³⁺ doped phosphate glass for NIR lasers** [13873-23]

POSTER SESSION

- 13873 OD **DUV quasi-CW laser of average power scalable over 10W and long lifetime using CLBO crystal for industrial application** [13873-10]
- 13873 OE **Study on the temperature dependence of the fluorescence spectrum from Nd, Cr: YAG for the improvement of the performance of solar-pumped lasers** [13873-25]
- 13873 OF **Tamm assisted metasurface emitting lasers (TAMSELS)** [13873-26]
- 13873 OG **Photonic crystal surface emitting laser bandstructure investigation using Fourier microscopy** [13873-27]
- 13873 OH **Molten-core radiation detectors for MISSE mission** [13873-29]
