

PROCEEDINGS OF SPIE

High-Power Diode Laser Technology XXIV

**Mark S. Zediker
Erik P. Zucker
Jenna Campbell**
Editors

**18–19 January 2026
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13876

Proceedings of SPIE 0277-786X, V. 13876

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Diode Laser Technology XXIV*, edited by Mark S. Zediker, Erik P. Zucker, Jenna Campbell, Proc. of SPIE 13876, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

BLUE AND VISIBLE LASER DIODE DEVICES AND PACKAGE

- 13876 02 **Exceeding 3kW high-power and high-brightness blue laser light source for laser processing using wavelength beam combining technology (Invited Paper)** [13876-1]
- 13876 03 **Kilowatt-class high-brightness blue diode laser using actively controlled dense wavelength beam combining technology for material processing** [13876-2]
- 13876 04 **Advancements in GaN-based high-power edge-emitting lasers for the blue and green spectral range** [13876-4]
- 13876 05 **RGB QuaLas (multichip package) for various applications** [13876-5]

LASER DIODE DEVICES I

- 13876 06 **Advances in infrared high-power lasers (Invited Paper)** [13876-6]
- 13876 07 **High-power, high-efficiency semiconductor laser diodes: advances and applications in the 780–1060nm wavelength range** [13876-7]
- 13876 08 **High-efficiency and wavelength stabilized 78x–80x nm laser diodes** [13876-8]
- 13876 09 **Longitudinal current profile modification for higher brightness in GaAs-based high-power diode lasers** [13876-9]

LASER DIODE DEVICES II

- 13876 0A **InP-based MOPA devices operating in the 1300nm–1700nm wavelength range with over 2W of single-mode, single-frequency power** [13876-10]
- 13876 0B **High-brightness tapered diode laser amplifiers at 1550nm and 1650nm** [13876-11]
- 13876 0C **2W-fiber-output of dual-port Raman pump (DPRP) with single-transverse-mode operation** [13876-12]
- 13876 0D **High-efficiency high-power on-chip wavelength-stabilized laser diodes and modules** [13876-27]

LASER DIODE PACKAGING AND RELIABILITY

- 13876 OE **Development of high-efficiency and thermally stable 793nm pump diodes for thulium laser pump applications** [13876-13]
- 13876 OF **Brightness and efficiency scaling of a 1kW direct diode laser module emitting at 780nm for additive manufacturing of aluminum** [13876-14]
- 13876 OG **A novel electrochemical corrosion resistant solution for water-cooled diode laser stack** [13876-15]
- 13876 OH **Industrial applications of diode laser heaters** [13876-17]

HIGH POWER DIODE PUMPS FOR IFE: JOINT SESSION WITH CONFERENCES 13876 AND 13888

- 13876 OI **Recent progress in the conceptual design of an LD-pumped 1kJ, 10Hz laser based on cryogenically cooled Yb:YAG scheme (Invited Paper)** [13876-18]
- 13876 OJ **Perspectives on the performance scaling of high-power diode laser pumps for use in inertial fusion energy systems (Invited Paper)** [13876-19]
- 13876 OK **QCW laser diode bar stacks with improved performance and technology** [13876-20]

LASER DIODES FOR LIDAR APPLICATIONS

- 13876 OL **From lab to road: the development and mass production of high-performance AR-VCSELs (Invited Paper)** [13876-21]
- 13876 OM **High-power diode optical amplifiers for FMCW LiDAR and AI data center applications** [13876-22]
- 13876 ON **Improving chirp and ranging of FMCW LiDAR by external cavity laser design** [13876-23]
- 13876 OO **Power scaling of broad-area laser diodes at 940nm** [13876-26]

POSTER SESSION

- 13876 OP **Next generation of ultrastable and high-power laser diode drivers** [13876-25]
