Volume 13882

Proceedings of SPIE 0277-786X, V. 13882

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nanoscale and Quantum Materials: From Synthesis and Laser Processing to Applications 2026*, edited by Andrei V. Kabashin, Masoud Mahjouri-Samani, Ioanna Zergioti, Proc. of SPIE 13882, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

2D MATERIALS I

- 13882 02 **Laser induced forward transfer of 2D materials and heterostructures for the digital fabrication of integrated photodetectors and modulators** [13882-1]
- 13882 03 **Laser-assisted synthesis of 2D materials: from wafer-scale polycrystalline films to single-crystalline monolayer and heterostructures** [13882-4]

ML-ASSISTED, AUTONOMOUS SYNTHESIS AND PROCESSING

- 13882 04 **Laser-based tools for high-throughput autonomous materials discovery and development (Invited Paper)** [13882-10]
- 13882 05 **Optimizing inkless printed electronics with machine learning models** [13882-13]

BIOMEDICAL APPLICATIONS OF NANOSTRUCTURED MATERIALS

- 13882 06 **Metamaterials meeting medicine: surface waves at an interface of bio-inspired metamaterial (Invited Paper)** [13882-15]
- 13882 07 **Chemical composition of silver-copper nanoparticles prepared by femtosecond laser ablation in water and organic solvents for biomedical and catalytic applications** [13882-16]

POSTER SESSION

- 13882 09 **Photoluminescence efficiency modulation of perovskite quantum dots based on high-entropy magnetic nanoparticles** [13882-31]
- 13882 0A **Improvement of monolayer MoS₂ defect and optical properties by using ultrafast annealing** [13882-32]
- 13882 0B **Optical spin orientation in epitaxial InAs/GaAs QDs: role of the wetting layer** [13882-33]
