**Volume 13884**

Proceedings of SPIE 0277-786X, V. 13884

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser 3D Manufacturing XIII*, edited by Bo Gu, Hongqiang Chen, Henry Helvajian, Proc. of SPIE 13884, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510696822

ISBN: 9781510696839 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## SPECIAL SESSION: ARTIFICIAL INTELLIGENCE (AI) AND 3D PRINTING

---

- 13884 02 **Hybrid physics-based machine learning method for detecting microscale surface defects in additive manufacturing using light scattering (Invited Paper)** [13884-5]
- 13884 03 **Towards an abstract description model for optical inline metrology in manufacturing to facilitate analysis by means of generative AI** [13884-6]
- 13884 04 **Multimodal data fusion for high-speed in situ detection of deformation defects in selective laser sintering** [13884-7]

---

## 3D MICRO-NANO PRINTING I

---

- 13884 05 **Volumetric fabrication without lenses: a world-first demonstration (Invited Paper)** [13884-8]
- 13884 06 **Combination of diode laser-based two-photon polymerization and masked stereolithography for microfluidic chip fabrication** [13884-9]
- 13884 07 **Ultrafast laser sintering of nanoparticles for nanoscale 3D metal printing** [13884-10]

---

## 3D MICRO-NANO PRINTING II

---

- 13884 08 **The influence of temperature variations on photopolymerization in phase transition stereolithography (Invited Paper)** [13884-11]
- 13884 09 **In-line digital holographic tomography for two-photon polymerization-based additive manufacturing** [13884-14]

---

## LPBF AND DED PROCESS

---

- 13884 0A **Development of a track level thermomechanical model for LPBF with a novel approach for plasticity computation** [13884-17]
- 13884 0B **Double-periodic Inconel 718 lattice structures realized by 3-axis hybrid additive manufacturing** [13884-18]

---

## MICRO-OPTICS AND FUNCTIONAL DEVICE PRINTING II

---

- 13884 0C **Laser-deposited TiO<sub>2</sub>/SiO<sub>2</sub> coatings for enhanced anti-reflection on quartz substrates (Invited Paper)** [13884-25]
- 13884 0D **Ultracompact multimodal endomicroscopy with a flexible fiber bundle and 3D-printed immersion micro-optics** [13884-28]

---

## POSTER SESSION

---

- 13884 0E **BaTiO<sub>3</sub>-embedded microstructures fabricated by two-photon polymerization** [13884-26]
- 13884 0F **High-speed SLA-type 3D printing of submillimeter-scale three-dimensional hollow THz waveguide components using RECILS and electroless plating** [13884-29]
- 13884 0G **Development of bonding between copper and aluminum by blue diode laser induced multibeam laser metal deposition** [13884-30]
- 13884 0H **Volumetric additive manufacturing of a laser diode collimator lens with xolography** [13884-31]
- 13884 0I **Impact of deep cryogenic cooling on the fatigue behaviour of hybrid manufactured IN718 components** [13884-33]
- 13884 0J **A low-cost 782.5nm-optical-fiber-based engine for TPP 3D printer** [13884-34]
