**Volume 13886**

Proceedings of SPIE 0277-786X, V. 13886

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems XV*, edited by Stefan Kaiserle, Klaus R. Kleine, Proc. of SPIE 13886, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## CUTTING AND DRILLING

---

- 13886 02 **High-throughput multibeam laser microdrilling using millisecond pulses** [13886-1]
- 13886 03 **High brightness kw single mode 2um fiber laser for CFRP processing** [13886-3]

---

## BEAM MANIPULATION, TRANSPORT, MEASUREMENT, AND SIMULATION

---

- 13886 05 **Towards higher throughput laser processing via high-speed beamforming and patterning** [13886-5]
- 13886 06 **Gas jet optics: bending an optical beam with a flow field** [13886-6]
- 13886 07 **3kW fiber laser using taper-fused side pump and signal combiner for processing highly reflective materials** [13886-8]

---

## PROCESS MONITORING AND CONTROL

---

- 13886 08 **Laser ablation image segmentation using vision-language models** [13886-10]
- 13886 09 **Real-time laser weld depth sensing with deep learning trained on paired OCT and metallography cross sections** [13886-11]
- 13886 0A **Signal enhancement for OCT weld-depth monitoring via adaptive maximum intensity projection** [13886-12]
- 13886 0B **Needle-beam OCT with diffractive phase design for real-time keyhole depth measurement in laser welding** [13886-13]

---

## JOINING AND WELDING AND HIGH POWER ULTRA SHORT PULSE PROCESSING

---

- 13886 0C **Single-pass pure laser welding of thick sections (up to 25mm) with a 28kW dynamic beam laser: process stability and mechanical** [13886-15]
- 13886 0D **Investigation on LASER welding of wrought aluminum sheets to high pressure die cast and additive manufactured components** [13886-16]

13886 0G **Investigation of ammonium chloride crystal formation on end faces of chlorine-rich fused silica hollow core fibers** [13886-19]

**POSTER SESSION**

---

13886 0I **Effects of focused spot variation on surface enhancement in laser peening** [13886-22]
