**Volume 13888**

Proceedings of SPIE 0277-786X, V. 13888

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Technologies for Inertial Fusion Energy II*, edited by Stavros G. Demos, Carmen S. Menoni, Proc. of SPIE 13888, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## HIGH POWER DIODE PUMPS FOR IFE: JOINT SESSION WITH CONFERENCES 13876 AND 13888

---

- 13888 02 **Enabling scalable inertial fusion energy with next-generation diode laser pump modules**  
[13888-1]
- 13888 03 **Efficiency and spectral behavior of > 1kW/bar multijunction semiconductor lasers**  
[13888-2]

---

## COST AND RELIABILITY OF DIODE PUMPS FOR IFE: JOINT SESSION WITH CONFERENCES 13876 AND 13888

---

- 13888 04 **Lifetime requirements for semiconductor lasers in inertial fusion energy systems**  
[13888-4]
- 13888 05 **Chip-level thermal management architectures for high-reliability laser diode pumps in inertial fusion energy systems** [13888-5]
- 13888 06 **Reliability of QCW diode stack as high power SSL-pump sources for large IFE facilities (Invited Paper)** [13888-6]

---

## IFE LASER DRIVERS I

---

- 13888 07 **Modeling of solid-state laser amplifiers** [13888-9]

---

## IFE LASER DRIVERS II

---

- 13888 08 **Exploring the potential of laser gain materials for inertial fusion energy laser drivers: a comparative approach** [13888-10]
- 13888 09 **Progress for commercializing IFE based on a novel high efficiency MJ class laser** [13888-14]

---

## IFE TARGETS

---

- 13888 0A **The physics of laser driven fusion ignition: status and challenges (Invited Paper)** [13888-22]

13888 0B **High performance potassium terbium fluoride (KTF) crystals for magneto-optic isolation**  
[13888-26]
