Sponsored and Published by

SPIE

Volume 13889

Proceedings of SPIE 0277-786X, V. 13889

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Power Delivery II*, edited by Bahram Jalali, Proc. of SPIE 13889, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510696921

ISBN: 9781510696938 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

POWER BEAMING AND WIRELESS POWER TRANSFER

- 13889 02 **Roadmap for laser power beaming technology advancements (Keynote Paper)** [13889-1]
- 13889 03 **Wireless power transfer for neural recording devices in freely behaving animals: current solutions and future directions (Invited Paper)** [13889-2]
- 13889 04 **Hybrid optical wireless watt-class power and GHz data transmission system for meter-range distance (Invited Paper)** [13889-3]

POWER-OVER-FIBER AND LASERS

- 13889 05 **Tests on power over fiber systems for safety high throughput co-transmission in analog radio over fiber fronthauls and space environments (Invited Paper)** [13889-4]

POWER CONVERTERS

- 13889 06 **Photovoltaic receivers for an orbital demonstration of laser power beaming** [13889-9]
- 13889 07 **Investigation of improving the conversion efficiency in GaAs power converter modules under uniform and non-uniform illumination** [13889-12]

POWER DELIVERY

- 13889 08 **Space-based optical wireless power transfer: progress towards a commercial end-to-end architecture** [13889-14]
- 13889 09 **Efficiency enhancement of optical wireless power transmission via weighted optimization of beam shape and power** [13889-16]
- 13889 0A **Laser-based wireless optical power transmission through the atmospheric boundary layer** [13889-17]
- 13889 0B **Laser-driven optical harvesting systems** [13889-18]

PHOTONIC POWER CONVERTERS I: JOINT SESSION WITH 13889 AND 13891

13889 0C **Limiting efficiencies of photovoltaic laser converters under laser light** [13889-20]

PHOTONIC POWER CONVERTERS II: JOINT SESSION WITH 13889 AND 13891

13889 0D **High-efficiency temperature-robust gallium nitride-based optical power converter**
[13889-22]

POSTER SESSION

13889 0E **Innovative multimode step-index fibers for improved transmission of blue and green laser radiation** [13889-24]

13889 0F **Thermographic localization of fiber breakage in multifiber cables using distributed low-power optical input** [13889-25]

13889 0G **Generation of ring-free Bessel-Gauss beams by using a spatial light modulator and its propagation characteristics** [13889-26]
