**Volume 13893**

Proceedings of SPIE 0277-786X, V. 13893

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic Photonic Materials and Devices XXVIII*, edited by Okihito Sugihara, Robert A. Norwood, Proc. of SPIE 13893, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510697034

ISBN: 9781510697041 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ORGANIC-INORGANIC HYBRID MATERIALS AND DEVICES

---

- 13893 02 **New approaches to the synthesis of sulfur-rich polymer optics for LWIR imaging (Invited Paper)** [13893-5]

---

## POLYMERIC OPTICAL MATERIALS AND DEVICES

---

- 13893 03 **Light-induced self-written optical waveguide technology: development and practical applications (Invited Paper)** [13893-6]
- 13893 04 **Thermo-optical properties and ultraviolet degradation of thermochromic paint for thermal control applications in space** [13893-8]
- 13893 05 **Exploring various thermosetting resin classes for passive photonic applications** [13893-7]

---

## NONLINEAR AND CHARGE TRANSFER PROCESS IN ORGANIC MATERIALS I

---

- 13893 06 **Lock-in-free ATR characterization of thin-film pockels coefficients using the prism coupler method (Keynote Paper)** [13893-11]
- 13893 07 **Experimental observation of electric field-controlled nonlinear dynamics in a photorefractive two-wave mixing process with poly(N-vinylcarbazole)-based polymer** [13893-13]

---

## NONLINEAR AND CHARGE TRANSFER PROCESS IN ORGANIC MATERIALS II

---

- 13893 08 **Highly photostabilized electro-optic polymer for next-generation high-speed optical modulator (Invited Paper)** [13893-15]
- 13893 09 **Optical and electrochemical characteristics of organic pigments derived from naturally occurring fungi** [13893-17]
- 13893 0A **Investigating and comparing (dithia)para- and (meta)para- cyclophanes platforms for tuning (through-space) TADF emission** [13893-16]

**POSTER SESSION**

---

- 13893 0B **Picking out the needle from the haystack: disentangling excitonic signals in organic polymer films** [13893-22]
- 13893 0C **High-efficiency deep-blue phosphor-sensitized fluorescent OLEDs enabled by cyano-substituted Pt(II) complexes** [13893-25]
