SPIE

Volume 13894

Proceedings of SPIE 0277-786X, V. 13894

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ultrafast Phenomena and Nanophotonics XXX*, edited by Markus Betz, Abdulhakem Y. Elezzabi, Proc. of SPIE 13894, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

EXCITONS AND POLARITONS

13894 02 **Forming solid films of potassium ferricyanide for achieving vibrational strong coupling**
[13894-4]

STRONG FIELD PHENOMENA

13894 03 **An ultrafast electronic phase change in SnSe (Invited Paper)** [13894-6]

PLASMONICS

13894 04 **Plasmonic ferroelectric tunnel junction random access memory (Invited Paper)** [13894-13]

13894 05 **Plasmonic catalysis: lighting up pyrolytic carbon (Invited Paper)** [13894-14]

13894 06 **Visualizing a terahertz superfluid plasmon in a two-dimensional superconductor (Invited Paper)** [13894-15]

CARRIER DYNAMICS IN NANOCRYSTALS

13894 07 **Cooperative enhancement of nonlinear optoelectronic responses in colloidal quantum dot solids** [13894-20]

CARRIER DYNAMICS IN TMDCS AND PEROVSKITES

13894 08 **Ultrafast tunneling spectroscopy on atomic length scales (Invited Paper)** [13894-27]

13894 09 **Ultrafast near-field spatiotemporal nanospectroscopy of lead telluride meta-atoms**
[13894-31]
