**Volume 13898**

Proceedings of SPIE 0277-786X, V. 13898

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2D Photonic Materials and Devices IX*, edited by Arka Majumdar, Carlos M. Torres Jr., Hui Deng, Proc. of SPIE 13898, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## ATOMICALLY LAYERED MATERIALS FOR QUANTUM TECHNOLOGIES II

---

13898 02 **Modulating high order susceptibility in monolayer MoS<sub>2</sub> using doping for integrated quantum photonics** [13898-8]

---

## ULTRAFAST NON-EQUILIBRIUM QUASIPARTICLE DYNAMICS IN 2D MATERIALS AND THEIR HETEROSTRUCTURES

---

13898 03 **Exciton trapping at the interface of lateral TMD heterostructures (Invited Paper)** [13898-14]

---

## ATOMICALLY LAYERED MATERIALS FOR QUANTUM TECHNOLOGIES IV

---

13898 04 **Characterization of 2D materials using complex-amplitude nonlinear spectroscopy (Invited Paper)** [13898-22]

---

## 2D MATERIAL EXCITON-POLARITON

---

13898 05 **Non-Hermitian effects on the exciton-polariton dispersion in 2D materials (Invited Paper)** [13898-29]

---

## 2D MATERIAL OPTOELECTRONICS AND INTEGRATED NANOPHOTONICS I

---

13898 06 **Direct probing of ultrafast hot-carrier injection and photo-induced degradation at Au/WS<sub>2</sub> interfaces using time-domain THz emission spectroscopy (Invited Paper)** [13898-48]

13898 07 **Optical vortex generation based on spin-orbit coupling leveraging the large birefringence of van der Waals materials** [13898-33]

---

## 2D MATERIAL OPTOELECTRONICS AND INTEGRATED NANOPHOTONICS II

---

13898 08 **Field-confined BP/MLG heterojunctions for room-temperature MWIR photodetectors** [13898-34]

---

**2D MATERIAL OPTOELECTRONICS AND INTEGRATED NANOPHOTONICS III**

---

- 13898 09 **Two novel strategies towards individualized, periodically organized pseudo 3D polyoxometalate self-assemblies** [13898-41]
- 13898 0A **Graphene-metal heterostructure for novel electro-optic modulator based on optical fiber Bragg grating device** [13898-39]

---

**POSTER SESSION**

---

- 13898 0B **Structural, electrical, and optical properties of phosphorus-doped multilayer  $\text{In}_6\text{Se}_7$  for application in van der Waals stacked homojunction devices** [13898-42]
