SPIE

Volume 13902

Proceedings of SPIE 0277-786X, V. 13902

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Silicon Photonics XXI*, edited by Graham T. Reed, Jonathan Bradley, Proc. of SPIE 13902, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510697218

ISBN: 9781510697225 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

ACTIVE INTEGRATION I

- 13902 03 **Heterogeneously integrated high-power single-wavelength laser on silicon via on-chip coherent beam combining** [13902-3]
- 13902 04 **Demonstration of all-silicon thermo-optic tunable microring modulator using AIM Photonics' 300mm process technology** [13902-4]

INTEGRATED DETECTORS AND SENSORS I

- 13902 05 **Heterogeneously integrated InGaAs/InP avalanche photodiodes on silicon nitride waveguides for 1550nm wavelength** [13902-7]
- 13902 06 **Data-efficient AI framework for optimizing germanium epitaxial layer growth in semiconductor processes** [13902-9]

WAVEGUIDE DEVICES AND APPLICATIONS I

- 13902 07 **Advances in photonic integrated circuit-based optical gyroscopes towards low-cost, high-precision inertial measurement units** [13902-11]
- 13902 08 **Photolithography compatible large area metamaterial emitters with full polarization and beam control via continuous translation symmetry breaking** [13902-13]
- 13902 09 **OTenna: a reconfigurable free-space optical fabric for chip-to-chip interconnects** [13902-14]

SILICON PHOTONICS RELIABILITY: JOINT SESSION WITH CONFERENCES 13901 AND 13902

- 13902 0A **Reliability in through silicon vias (TSVs) (Invited Paper)** [13902-15]

PHOTONIC INTEGRATED CIRCUIT DESIGN AND MANUFACTURING

- 13902 0C **Process control case-studies for high-volume manufacturing of silicon photonics for co-packaged optics applications** [13902-17]

13902 OD **Manufacturing-aware adjoint optimization for DRC-compliant silicon photonic devices**
[13902-18]

ACTIVE INTEGRATION II

13902 OE **Stimulated Brillouin scattering in scalable integrated photonic platforms (Invited Paper)**
[13902-20]

13902 OG **Low- V_{π} , coupling-optimized, single-ended push-pull ring-assisted Mach-Zehnder modulators for integration with high-speed, low-swing voltage drivers in integrated silicon-photonic platforms** [13902-22]

13902 OH **AI-assisted hyperspectral imaging for narrow-band lasers using photon-trapping silicon photodiodes** [13902-23]

INTEGRATED DETECTORS AND SENSORS II

13902 OI **Broadband PureB Ge photodiodes fabricated on highly doped n⁺-Si for operation down to 0V** [13902-26]

13902 OJ **High-Q plasmonic sensing using a metasurface of toroidal dipole nanostructures** [13902-24]

13902 OK **Enhanced sensitivity of silicon-based Schottky detectors for detecting human-body temperature** [13902-28]

WAVEGUIDE DEVICES AND APPLICATIONS II

13902 OL **Long reach 8 (LR-8) silicon-nanowire optical demultiplexer for 400GbE and beyond in datacenter applications** [13902-29]

13902 OM **Thermally reconfigurable broadband silicon photonic splitter** [13902-30]

ACTIVE INTEGRATION III

13902 ON **Phonon engineering for silicon photonics: measurements of thermal properties and implications for heat management and power-efficient devices** [13902-35]

13902 OO **Very low loss sputtered SiN waveguides compatible with 300mm BEOL integration**
[13902-12]

POSTER SESSION

- 13902 0P **Exploiting broad incident angle ranges in diffraction grating SPR spectroscopy** [13902-37]
- 13902 0Q **SiP-based dot product operator for edge computing applications** [13902-38]
- 13902 0R **Simplified high-speed all-optical logic gates using micro-ring resonators** [13902-39]
- 13902 0S **Silicon nitride biosensor with an optimized nonlinear fiber-to-chip coupler** [13902-43]
- 13902 0T **Study of silicon photonics under-cavity etching** [13902-45]
- 13902 0U **All-optical, dual-band pump-programmed silicon OPA for beam steering** [13902-46]
- 13902 0V **Facilitating hot carrier generation via composite pyramid structures to enhance silicon-based mid-wave infrared photodetection** [13902-48]
- 13902 0W **Inverse design, silicon photonic combined wavelength demultiplexer/splitter** [13902-49]
- 13902 0X **Performance evaluation of concave and convex gap geometries in the midregion of inverse-designed y-splitters** [13902-50]
- 13902 0Y **Compact-graded-index-silicon-based MMI using KOH etching for wideband applications** [13902-52]
- 13902 0Z **Silicon photonics sensor leveraging both absorption and refractive index change** [13902-53]
- 13902 10 **Silicon photonics PAM4 modulator for optically connected memory links** [13902-57]
