Volume 13903

Proceedings of SPIE 0277-786X, V. 13903

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Interconnects and Packaging 2026*, edited by Ray T. Chen, Richard C. A. Pitwon, Proc. of SPIE 13903, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

CO-PACKAGED OPTICS

13903 02 **Radix-expanded densely-spaced WDM technology for co-packaged optics switches (Invited Paper)** [13903-1]

13903 03 **Active alignment for co-packaged optics: an integrated solution to the alignment challenges of multichannel optical devices** [13903-2]

13903 04 **Optimized passive V-groove alignment for low-loss optical coupling in co-packaged systems** [13903-3]

13903 05 **4D microwave photonic co-packaging and optical computing with the low-power ultra-high-speed millimeter wave optoelectronic CMOS technology** [13903-4]

13903 06 **Energy-efficient ultracompact 106-Gb/s PAM4 × 8-channel VCSEL-based CPO transceiver (Invited Paper)** [13903-5]

PIC INTEGRATION AND OPTICAL COUPLING

13903 07 **Towards next generations of fiber arrays driven by active alignment (Invited Paper)** [13903-7]

13903 08 **Highly dense multimode fiber bundles** [13903-9]

NOVEL OPTICAL WAVEGUIDE AND INTEGRATED INTERCONNECT TECHNOLOGIES

13903 09 **Enabling scalable co-packaged optics through high-precision glass structuring and photonic integration on panel-level substrates (Invited Paper)** [13903-11]

13903 0A **Stable, high-efficiency, and robust electro-optic (EO) polymers for integrated silicon-organic hybrid (SOH) EO modulators in the datacom and telecom wavelengths (Invited Paper)** [13903-12]

13903 0B **Structural optimization of polymer waveguide-based adiabatic couplers fabricated using the mosquito method for co-packaged optics applications** [13903-13]

13903 0C **High-efficiency design methodology powered by machine-learning for fiber-to-chip coupling in co-packaged optics** [13903-14]

NANOPHOTONIC TECHNOLOGY FOR DATA STORAGE, SWITCHING, AND INTERCONNECT

13903 0D **Heat-assisted magnetic recording for ultrahigh capacity HDDs (Invited Paper)** [13903-15]

13903 0E **Broadband optical nonreciprocity enabled by magneto-optic effects for optical communication and signal processing applications** [13903-18]

13903 0F **A routing-centric 3D photonic network-on-chip for in-package AI systems** [13903-19]

OPTICAL AND PHOTONIC COUPLING PLATFORMS AND COMPONENTS

13903 0G **Scalable hybrid laser integration via microtransfer printing for silicon photonic platforms (Invited Paper)** [13903-21]

13903 0H **Challenges and opportunities of detachable metallic interconnects fiber-to-chip connectors for co-packaged optics in high-volume production** [13903-20]

PHOTONIC INTERCONNECT COMPONENTS AND PACKAGING FOR EXTREME ENVIRONMENTS

13903 0I **High-density optical packaging of photodetectors and surface emitting optical sources from cryo to room-temperature for quantum, AI, and aerospace applications (Invited Paper)** [13903-27]

HYBRID INTEGRATED OPTICAL LINK MODULES

13903 0J **Advanced 2.5D co-packaged optical solutions for high-efficiency AI workloads and cloud computing: delivering 6.4Tb/s per port, towards 204Tb/s switch-ASICS** [13903-32]

13903 0K **Dynamic inline pluggable photonic subsystems (DIPPS)** [13903-33]

13903 0L **Narrow-stripe edge-emitting micro-LEDs for high-density on-board optical interconnects** [13903-34]

13903 0M **VCSEL-based technologies to interconnect optically XPUs and HBMs on an interposer chip** [13903-25]

OPTICAL AND PHOTONIC SWITCHING

13903 0N **AI cluster networks based on distributed WDM photonic switches (Invited Paper)** [13903-36]

13903 0O **Energy-efficient composable optical cellular-switched topology for future low energy data centers (Invited Paper)** [13903-37]

PHOTONIC COMPUTING AND PROGRAMMABLE SWITCHING

13903 0P **Optical interconnects based on gain-controlled silicon photonic switches** [13903-41]

OPTICAL MODELLING, INSPECTION, AND ANALYSIS

13903 0Q **Fiber-to-fiber and fiber-to-chip connections for high-density optical I/O: an automated multiphysics optimization framework** [13903-44]

13903 0R **Advanced inspection of nonplanar fiber optic and photonic interfaces** [13903-45]

13903 0S **Robustness analysis of photonics links for GPU architectures leveraging bit error rate performance** [13903-46]

13903 0T **Analysis and optimization of chip-to-fiber coupling interfaces for micro-LED-based optical communications** [13903-47]

MICRO-OPTIC ASSEMBLY AND HYBRID PHOTONIC MICROSYSTEM MANUFACTURING

13903 0U **Design, production, and testing of injection molded microlens arrays for co-packaged optics (Invited Paper)** [13903-48]

13903 0V **Glass-panel-based packaging: optical waveguides for data transport in large packages (Invited Paper)** [13903-49]

13903 0W **CO_2 laser splicing of dissimilar materials** [13903-51]

PHOTONIC ASSEMBLY AND TESTING PROCESSES

13903 0X **Toward large-scale photonics-empowered AI systems: from physical design automation to system-algorithm co-exploration (Invited Paper)** [13903-53]

13903 0Y **Automated process for soldering, assembly, and alignment of external cavity diode lasers (Invited Paper)** [13903-54]

POSTER SESSION

13903 0Z **Vision transformer architectures for AI-enhanced optical testing of photonic integrated circuits** [13903-55]

13903 10 **Building a microintegrated laser module with fiber coupling at 720nm: design, simulation, and verification** [13903-58]
