Volume 13905

Proceedings of SPIE 0277-786X, V. 13905

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Optical Communication: Components, Sub-Systems, and Systems XV*, edited by Guifang Li, Atul K. Srivastava, Ryuichi Sugizaki, Proc. of SPIE 13905, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

FIBER SENSING

13905 03 **Advances in fiber sensing (Invited Paper)** [13905-2]

NETWORK AND MONITORING

13905 04 **High-sensitivity, long-reach localization and mapping of fiber optic networks using cost-efficient distributed vibration sensing** [13905-4]

13905 05 **Keeping the light on: monitoring in commercial networks (Invited Paper)** [13905-5]

13905 06 **GNN-based bounded maximum flow approximation for routing and wavelength assignment in dynamic optical networks** [13905-6]

13905 07 **High-port-count optical circuit switch architecture enabling IM/DD transmission through static chromatic dispersion compensation** [13905-7]

ACCESS NETWORK

13905 08 **Low-complexity burst mode DSP for coherent PON (Invited Paper)** [13905-8]

13905 09 **SOA-based optical switched metro-access networks (Invited Paper)** [13905-9]

13905 0A **Coherent optics enabling fading resilient free space transmission (Invited Paper)** [13905-10]

13905 0B **Decentralized smart traffic signal control using IoT-based multiagent reinforcement learning and VLC communication** [13905-11]

13905 0C **Probabilistic link budget analysis for low-Earth orbit satellites in the optical regime** [13905-12]

HIGH SPEED DEVICES AND THEIR APPLICATIONS

13905 0D **Beyond 1.6Tbps transceivers: roadmap and enabling technologies (Invited Paper)** [13905-13]

13905 0E **Recent advance of over 400-Gb/s per lane modulator PIC (Invited Paper)** [13905-14]

- 13905 OF **High-bitrate operation of a III-V pin-photodetector array with wide wavelength range and high-responsivity** [13905-15]
- 13905 OG **Evaluating DSP algorithms, system architecture, and faster-than-Nyquist transmission for 3.2-Tb/s data center interconnects (Invited Paper)** [13905-16]
- 13905 OH **Cost-effective, high-performance heterogeneous integration for 6.4T and beyond 224Gbps/lane co-packaged-optical engines for AI/ML and data center** [13905-17]

HIGH SPEED COMPONENTS AND THEIR APPLICATIONS

- 13905 OI **Ultra-high-capacity transmission exploiting the OESCLU-band (Invited Paper)** [13905-18]
- 13905 OJ **Erbium-doped fibers for broadband amplification (Invited Paper)** [13905-19]

FIBER CABLES AND CONNECTORS

- 13905 OK **Innovation in optical fibers and cables enabling scaling optical network capacity (Invited Paper)** [13905-21]
- 13905 OM **High-density connectivity solutions for short reach datacenter applications (Invited Paper)** [13905-23]

NEW DEVICES

- 13905 OP **Coherent and IM-DD data signals, including time transfer, fiber sensing, and QKD, transmitted in one ULL fiber** [13905-28]
