SPIE

Volume 13909

Proceedings of SPIE 0277-786X, V. 13909

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic and Phononic Properties of Engineered Nanostructures XVI*, edited by Ali Adibi, Mark L. Brongersma, Proc. of SPIE 13909, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

PHOTONIC NANOSTRUCTURES FOR IMAGING AND SENSING APPLICATIONS I

13909 02 **Nanowaveguide-based high-efficiency optical phased array for wide-angle beam steering** [13909-76]

PHOTONIC NANOSTRUCTURES FOR IMAGING AND SENSING APPLICATIONS II

13909 03 **Angle-robust dielectric metasurface filters for high-fidelity, real-time spectral imaging in the SWIR** [13909-19]

13909 04 **Hybrid metasurface-polyethylenimine platform for CO₂ gas sensing** [13909-20]

INTEGRATED NANOPHOTONICS: NOVEL PLATFORMS AND APPLICATIONS

13909 05 **Design rule-compliant inverse design for silicon photonics using deep generative networks with embedded length-scale constraints** [13909-38]

NOVEL STRUCTURES FOR LIGHT EMISSION AND HARVESTING

13909 06 **InP nanorods embedded metasurface for enhancement of solar energy harvest** [13909-42]

NOVEL INVERSE DESIGN TECHNIQUES FOR NANOPHOTONIC STRUCTURES

13909 07 **Deep learning-driven inverse design methodology of large-scale metalenses for virtual reality applications** [13909-46]

NOVEL DEVICES AND PHENOMENA IN ENGINEERED NANOSTRUCTURES

13909 08 **All-optical nonlinearity for deep learning via dielectric resonant metasurface driven by non-degenerate two-photon absorption** [13909-53]

13909 09 **Generation of cylindrical vector vortex beams by tailoring the enantiomeric excess in an optically active solution** [13909-54]

PLASMONIC NANOSTRUCTURES

- 13909 0A **Plasmonic optical tweezers with C-shaped nanostructures** [13909-55]
- 13909 0B **Photonic crystal enhanced fluorescence using integrated high refractive index nanodiamond-plasmonic gold cryosoret nano-assemblies for ultrasensitive detection** [13909-58]

NANOSTRUCTURES FOR QUANTUM SCIENCE AND ENGINEERING

- 13909 0C **Effective purcell suppression for high-yield manufacturing of ultra-efficient broadband micropillars** [13909-60]
- 13909 0D **Semiconductor optical cooling of perovskite quantum dots: limits of Auger recombination and beyond** [13909-62]

POSTER SESSION

- 13909 0E **Transmission-type polarization-independent thin metal metasurface color filter** [13909-64]
- 13909 0F **Design and simulation of a 2D Tamm-plasmon photonic crystal cavity** [13909-65]
- 13909 0G **Optical refrigeration with thulium doped fluoride glass** [13909-72]
- 13909 0H **Metamaterial absorber-enhanced thermoelectric system for infrared waste heat recovery** [13909-74]
- 13909 0I **Reconfigurable oxide-fluoride thin-film platform via ALD for UV and broadband optical applications** [13909-79]
