SPIE

Volume 13910

Proceedings of SPIE 0277-786X, V. 13910

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High Contrast Metastructures XV*, edited by Connie J. Chang-Hasnain, Andrea Alù, Weimin Zhou, Proc. of SPIE 13910, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

LIGHT ENGINEERING

- 13910 02 **Models for the BRDF of disordered metasurfaces (Invited Paper)** [13910-5]
13910 03 **Towards neural network integration of metasurfaces in optical design software** [13910-6]

MULTILAYER METASURFACES

- 13910 04 **New fabrication technique for Si in SiO₂ multimetasurface layers** [13910-10]

METASURFACE FOR LIGHT EMITTING DEVICE

- 13910 05 **A super-compact Galilean beam expander enabled by a sandwich-type double-metasurface** [13910-22]

METASURFACE FOR IMAGING

- 13910 06 **Fabrication and validation of meta-optics for infrared imaging applications** [13910-25]

METASURFACE APPLICATIONS

- 13910 07 **Visible light metalens for advanced automotive optics** [13910-30]
13910 08 **A simplified guided-mode-resonant wavelength filter with ultra-low aspect ratio for polarization-insensitive performance at 45-degree incidence** [13910-31]
13910 09 **Polarization-multiplexed collimating diffractive metasurface without zeroth-order effect for 3D sensing** [13910-32]

META-OPTICS FABRICATION AND MANUFACTURING

- 13910 0A **Glass based visible metasurfaces with deep glass etching technique** [13910-34]

METASURFACE DEVICES

13910 0B **Reflectionless perfect linear polarization rotator** [13910-44]

METASURFACE WITH SPECIAL DESIGN

13910 0C **Metaoptic bilens collimator for edge-emitting laser diodes** [13910-50]
