Volume 13911

Proceedings of SPIE 0277-786X, V. 13911

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Vertical-Cavity Surface-Emitting Lasers XXX*, edited by Chun Lei, Luke A. Graham, Proc. of SPIE 13911, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SPECIAL SESSION ON VECSELS: NOVEL CONCEPTS

- 13911 02 **Experimental investigation of nonlinear coupling constant for circular polarizations in a spin-laser** [13911-4]

SPECIAL SESSION ON MECSELS AND VECSELS: SYSTEMS AND APPLICATIONS

- 13911 03 **Multipass pumping of VECSELS and MECSELS for high-power applications** [13911-6]
- 13911 04 **Development and demonstration of a VECSEL based sodium guidestar system** [13911-7]
- 13911 05 **Optimization of a frequency-doubled MECSEL for on-sky tests as a laser guide-star (VECSEL Best Student Presentation Award)** [13911-8]

SPECIAL SESSION ON MECSELS AND VECSELS: QUANTUM APPLICATIONS

- 13911 06 **Low-noise membrane external-cavity surface-emitting laser for the optical excitation of NV-centres in diamonds** [13911-11]

VCSEL TECHNOLOGY AND COMMERCIAL APPLICATIONS

- 13911 07 **High performance 905nm and 940nm multijunction VCSELS for automotive and industrial applications** [13911-14]
- 13911 08 **High-performance common-anode multijunction VCSEL arrays for LiDAR applications** [13911-15]
- 13911 09 **Comprehensive reliability study of high-speed 850nm VCSELS for optical links in AI and data center** [13911-16]

HIGH-SPEED VCSELS FOR OPTICAL INTERCONNECTS

- 13911 0A **Advancing VCSEL technology for short reach data links (Invited Paper)** [13911-17]

- 13911 0B **Highly reliable 1060nm metal aperture single-mode VCSEL with 180Gbps direct modulation at 85°C (Invited Paper)** [13911-18]
- 13911 0C **850nm VCSEL for 112Gbps NRZ and 200Gbps PAM4 optical interconnects** [13911-19]
- 13911 0D **4x4 back-emitting VCSEL array with integrated HCG metalens for high-speed optical interconnects** [13911-20]

VCSEL RELIABILITY AND CHARACTERIZATION

- 13911 0E **Reliability and failure analysis of high-speed 850nm multimode oxide-confined VCSELs lifetested in air and vacuum for space applications (Invited Paper)** [13911-21]
- 13911 0F **Microscopic reverse-bias electroluminescence spectra and spectral images of 850nm oxide-confined VCSELs during burn-in** [13911-22]
- 13911 0G **Influence of optical coupling strength on the resonant oscillation frequency in multiaperture VCSELs** [13911-24]

VCSEL STRUCTURES, POLARIZATION, AND SENSING PERFORMANCE

- 13911 0H **Efficient wavelength-scale VCSELs via lithographically defined cavities** [13911-26]
- 13911 0I **Polarization study on 1130nm VCSEL with integrated surface relief mode coupler** [13911-27]
- 13911 0J **Design and analysis of dual-cavity VCSELs** [13911-28]
- 13911 0K **2D uniform high-contrast metastructure for single mode VCSEL** [13911-29]

HIGH-POWER VCSEL ARRAYS AND PERFORMANCE SCALING

- 13911 0L **Reliability of high performance 660nm VCSEL arrays for consumer applications** [13911-31]
- 13911 0M **Single mode approaches for multijunction vertical cavity surface emitting lasers** [13911-33]
- 13911 0N **Manufacturable Q-VCSELs for quantum sensors** [13911-34]

NOVEL WAVELENGTHS, MATERIALS, AND EMERGING APPLICATIONS

- 13911 OO **High-efficiency InP SWIR VCSEs enabled by a mass-producible nanoporous DBR (Invited Paper)** [13911-35]
- 13911 OP **High-efficiency 1680nm InP VCSEs with nanoporous DBRs** [13911-39]
- 13911 OQ **Observation and simulation of optical performance in low dimensional VCSEL structures** [13911-40]
