

PROCEEDINGS OF SPIE

Light-Emitting Devices, Materials, and Applications XXX

Jong Kyu Kim
Michael R. Krames
Martin Strassburg
Editors

19–22 January 2026
San Francisco, California, United States

Sponsored and Published by
SPIE

Volume 13913

Proceedings of SPIE 0277-786X, V. 13913

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Light-Emitting Devices, Materials, and Applications XXX*, edited by Jong Kyu Kim, Michael R. Krames, Martin Strassburg, Proc. of SPIE 13913, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

UV AND DUV LEDs AND THEIR APPLICATIONS I

- 13913 02 **A unified framework for evaluating UV-C sources: introducing the cost of germicidal energy (CGE) metric (Invited Paper)** [13913-2]

SUBSTRATES FOR LED EPITAXIAL GROWTH/EFFICIENCY CHALLENGES

- 13913 03 **Design, fabrication, and effect of polymeric passivation layers to suppress sidewall recombination in high efficiency GaN μ LEDs** [13913-11]
- 13913 04 **Full-color micro-LED display enabled by photolithographic nano-phosphor patterning** [13913-12]

WAVELENGTH CONVERSION MATERIALS AND COMPONENTS

- 13913 05 **Single-phase white-light emission via mixed-valence $\text{Eu}^{2+}/\text{Eu}^{3+}$ and Tb^{3+} co-doping in lead-free vacancy-ordered perovskite Cs_2ZrCl_6** [13913-16]

LED MANUFACTURING I

- 13913 06 **New advances in semiconducting AlN and prospects for future optoelectronic devices (Invited Paper)** [13913-18]

MEASUREMENTS AND CHARACTERIZATIONS FOR LED MATERIALS AND DEVICES

- 13913 07 **Link between defects, quantum efficiency, and degradation trends in UV-C LEDs (Invited Paper)** [13913-23]
- 13913 08 **Ultrabright and highly efficient lead-free copper(I)-based halides for high-performance white light-emitting diodes** [13913-24]

LED MANUFACTURING II

- 13913 09 **Advanced III-nitride nanorod pixel structures for AR near-eye display applications (Invited Paper)** [13913-29]
- 13913 0A **Mass transfer and heterogeneous integration of thin-film III-nitride micro-LEDs via metal-metal bonding** [13913-30]

LEDS FOR AR/VR/MR/XR II

- 13913 0B **MicroLED transfer technologies for emerging optoelectronic applications (Invited Paper)** [13913-39]
- 13913 0C **Scalable self-aligned integration of microLEDs and III-N devices via fluidic and vdW assembly (Invited Paper)** [13913-41]
- 13913 0D **Air-side beam steering of electroluminescence from GaN/InGaN microLEDs via quasi-freeform dielectric metasurfaces** [13913-42]
- 13913 0E **Numerical evaluation of nano-scale structure for optical field adjustment in small micro LEDs** [13913-43]

LIGHT-BASED SENSORS AND COMMUNICATION

- 13913 0F **Advanced signal processing and visible light communication for AGV coordination in automated warehouses** [13913-46]

POSTER SESSION

- 13913 0G **UV LED-based solar flare simulator for space environment studies** [13913-47]
- 13913 0H **Simulation of an indoor LiFi system based on a microLED transmitter** [13913-51]
