SPIE

**Volume 13914**

Proceedings of SPIE 0277-786X, V. 13914

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Sensing and Precision Metrology II*, edited by Jacob Scheuer, Proc. of SPIE 13914, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510697454

ISBN: 9781510697461 (electronic)

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## RB AND VAPOR BASED SENSING

- 13914 02 **Temperature and pressure dependence of diffusion coefficients of Rb-inert gas mixtures using coherent scattering from optically pumped population gratings (Invited Paper)** [13914-1]

---

## FIBER OPTICS

- 13914 03 **Selective laser etched side-polished single mode fiber with phase-OFDR readout: a novel platform for high resolution distributed refractive index sensing** [13914-4]
- 13914 04 **Experimental flow loop study on fiber Bragg grating (FBG) sensor placement for monitoring severe internal metal loss in wrapped pipelines** [13914-5]
- 13914 05 **MOF-on-MOF thin film coated optical fiber sensor for rapid humidity sensing** [13914-6]
- 13914 06 **Multiparameter measurements using dual-core, polarization maintaining side-hole fiber** [13914-9]

---

## INERTIA AND MECHANICAL SENSORS

- 13914 07 **Optimization of sensitivity of an opto-mechanical transducer (Invited Paper)** [13914-14]
- 13914 08 **Acoustic signal response in solid structures measured by distributed acoustic sensing** [13914-17]
- 13914 09 **Design and modeling of a single-ring exceptional-point ring-laser gyroscope with improved angular random walk (Invited Paper)** [13914-18]

---

## INTEGRATED OPTICS

- 13914 0A **Simulation-based development of an integrable optical deformation sensor using TIR prism rods** [13914-21]

## SPECTROSCOPY

---

- 13914 0B **Detection of removable contaminants on the surface of a glass substrate by using a bright-field multispectral imaging system (BMIS)** [13914-30]
- 13914 0C **Spectroscopic ellipsometry comparison of different liquid samples** [13914-31]
- 13914 0D **Integrated wideband antenna for molecular emission spectroscopy** [13914-33]

## ADVANCED TOPICS

---

- 13914 0E **3-body interactions in Brownian circuits for randomized benchmarking (Invited Paper)** [13914-35]
- 13914 0F **Nonlinear optics in surface nanoscale axial resonators (Invited Paper)** [13914-37]
- 13914 0G **Amplitude and phase-resolved common-path dual-comb sensing (Invited Paper)** [13914-54]

## POSTER SESSION

---

- 13914 0H **Development of multispectrum analysis system in micro-ellipsometry for high-accuracy thin-film metrology** [13914-41]
- 13914 0I **Micromechanical characterization of alginate hydrogels using confocal Brillouin spectroscopy** [13914-48]
