SPIE

Volume 13915

Proceedings of SPIE 0277-786X, V. 13915

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advances in Display Technologies XVI*, edited by Jiun-Haw Lee, Liang-Chy Chien, Liangcai Cao, Proc. of SPIE 13915, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510697478

ISBN: 9781510697485 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MICRO-LED

- 13915 02 **A colloidal-quantum-dot color conversion layer goes beyond 10000 pixels per inch (Invited Paper) [13915-1]**
- 13915 03 **High-resolution and spectrally purified 7561-PPI panchromatic micro-LED displays via blue-light-driven color conversion technology (Invited Paper) [13915-2]**
- 13915 04 **Optical enhancement of mechanically flexible μ LEDs enabled by photonic transfer processes [13915-4]**

NTE DISPLAY

- 13915 05 **Compact holographic near-eye display (Invited Paper) [13915-6]**
- 13915 06 **Development of ultracompact and ultrathin spatial light modulators for realizing holographic contact lens displays [13915-7]**

3D AND AI DISPLAYS

- 13915 07 **A polygon-based hologram generated using the split-Lohmann lens method (Invited Paper) [13915-10]**
- 13915 08 **AI technology for e-paper displays (Invited Paper) [13915-12]**
- 13915 09 **Speckle reduction in far field holograms using spatial light modulators [13915-13]**

ORGANIC OPTOELECTRONICS FOR DISPLAYS

- 13915 0A **Co-packaging of organic photodetector with microLED matrix for multifunctional display bio-application [13915-18]**

DISPLAY METROLOGY

- 13915 0B **Beyond simulation: assessing 2D IQA metrics in real-world 3D displays and their role in calibration optimization** [13915-20]
- 13915 0C **Optical measurements for performance characterization of displays with switchable privacy** [13915-21]
- 13915 0D **Comparison of perceived brightness and colorfulness for various display technologies** [13915-22]

LC COMPOSITE AND MEASUREMENT

- 13915 0E **Acoustically assisted orientation stabilization of hyperswollen lyotropic lamellar phase (Invited Paper)** [13915-23]

FLC AND BEAM STEERING

- 13915 0F **Roles of charge distribution on the stability of ferroelectric nematic liquid crystals (Invited Paper)** [13915-27]
- 13915 0G **New ferroelectric liquid crystal mixture with improved low temperature characteristics and voltage threshold for LCOS and SLM** [13915-28]
- 13915 0H **Large stepwise non-continuous beam steering with a few-hundreds microseconds response time liquid crystal technology based on combination of polarization grating and grating diffraction (Invited Paper)** [13915-30]
- 13915 0I **VLC node based on photovoltaic detector and liquid crystal passive modulated retroreflector** [13915-33]

POSTER SESSION

- 13915 0J **Plane wave assisted image contrast enhancement in holographic displays** [13915-34]
- 13915 0K **Metasurface for chiral emission with the chiral field enhancement in the WS₂ monolayer** [13915-35]
- 13915 0L **Precision wavelength calibration for display spectroradiometers: a reproducibility study** [13915-36]
- 13915 0M **Modular spectroradiometer accessories for AR/VR near-eye display metrology** [13915-37]
