SPIE

Volume 13916

Proceedings of SPIE 0277-786X, V. 13916

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Ultra-High-Definition Imaging Systems IX*, edited by Toyohiko Yatagai, Yasuhiro Koike, Proc. of SPIE 13916, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

AR/VR TECHNOLOGY

- 13916 02 **Developments of contact lens display based on holographic technique (Invited Paper)** [13916-1]
- 13916 03 **Wedge prism array design for a glasses-free multiview holographic combiner** [13916-2]
- 13916 04 **Expansion of display area for tabletop volume holographic displays using spatially-shifted angular multiplexing** [13916-3]
- 13916 05 **Analysis of multiple line-beam structured-light with volume holography** [13916-27]
- 13916 06 **Ultra-high-definition (UHD) display and imaging for near-to-eye (NTE) AR/VR/MR: requirements and achievements (Invited Paper)** [13916-6]

HIGH-SPEED COMM SYSTEMS

- 13916 07 **Design and evaluation of a lightweight codec for error-free POF** [13916-15]
- 13916 08 **Low latency streaming from a multicamera array to a UHD display wall** [13916-16]
- 13916 09 **Responsive link for real-time communications (Invited Paper)** [13916-17]

DISPLAY TECHNOLOGY I

- 13916 0A **Integrated metaoptics for super-resolved imaging (Invited Paper)** [13916-18]
- 13916 0B **Ultra-high resolution wireless CMOS imaging with multiple-band millimeter waves and multiplexed guided light waves: why this approach is better than traditional CMOS image sensors and III-V/II-VI diode sensors** [13916-19]
- 13916 0C **Advancements in high-resolution imaging technologies for immersive media (Invited Paper)** [13916-20]
- 13916 0D **Toward a sustainable ecosystem for aerial displays: a triple-track approach integrating research, deployment, and standardization (Invited Paper)** [13916-21]

DISPLAY TECHNOLOGY II

- 13916 0E **Field-of-view measurement based on a threshold for aerial displays** [13916-25]
- 13916 0F **Micro-nanoscale metrology for reference material size from speckle pattern images**
[13916-26]
- 13916 0G **Recent progress on enhancing realism of wearable extended reality displays
(Invited Paper)** [13916-4]
