

PROCEEDINGS OF SPIE

***Quantum Computing,
Communication,
and Simulation VI***

**Philip R. Hemmer
Alan L. Migdall
Ivan A. Burenkov**
Editors

**17–23 January 2026
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 13919

Proceedings of SPIE 0277-786X, V. 13919

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Computing, Communication, and Simulation VI*, edited by Philip R. Hemmer, Alan L. Migdall, Ivan A. Burenkov, Proc. of SPIE 13919, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510697553

ISBN: 9781510697560 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTEGRATED QUANTUM OPTICS

- 13919 02 **Topological Floquet integrated photonics for entanglement generation (Invited Paper)**
[13919-1]
- 13919 03 **Flip chip interconnects for quantum computing application: a comparison between
fin-silver and indium bump** [13919-2]

QUANTUM COMMUNICATION AND SUPPORTING TECHNOLOGY I

- 13919 04 **Industrial implementation of an ultrastable clock laser for quantum technologies** [13919-5]
- 13919 05 **Integrated 795nm narrow linewidth MOPA butterfly laser for quantum sensing and
magnetometry** [13919-6]

QUANTUM COMMUNICATIONS AND CRYPTOGRAPHY I

- 13919 06 **Quantum true random number generator based on photon-trapping avalanche
photodiodes** [13919-12]
- 13919 07 **Fiber-based distribution of two-mode-squeezed entangled states between separate
buildings for cv-QKD** [13919-91]
- 13919 08 **Time-delay polarization control for quantum key distribution qubit state discrimination**
[13919-14]

QUANTUM PHOTONICS

- 13919 09 **Photonic interconnects for cryogenic quantum systems (Invited Paper)** [13919-16]
- 13919 0A **Quantum gate design using integrated photonics: a comparative study** [13919-17]

QUANTUM FREQUENCY TRANSDUCERS II

- 13919 0B **Efficient NV center wavelength conversion and noise suppression via adapted poling
method in nanophotonic lithium niobate waveguides** [13919-99]

SOURCES I

- 13919 0C **Cavity QED with individual cryogenic molecules** [13919-27]
- 13919 0D **Epitaxial growth of low density InAs/GaAs quantum dots emitting in 1.3-1.6 μ m range** [13919-30]

SOURCES II

- 13919 0E **On the photophysics and room temperature quantum emission of various epitaxial p-type GaN** [13919-33]
- 13919 0F **Towards a quantum switch preserving polarization entanglement** [13919-86]

QUANTUM MEMORY, ATOMS, AND REPEATERS

- 13919 0G **Towards a quantum repeater using a surface-trap-integrated microcavity and trapped ions (Invited Paper)** [13919-37]
- 13919 0H **Electron beam profiling via Rydberg electromagnetically induced transparency in rubidium vapor with crossed laser beams (Invited Paper)** [13919-39]

SOURCES III

- 13919 0I **Ultracompact, space-suitable, and hybrid entangled photon source for satellite-based QKD** [13919-42]
- 13919 0J **Cascaded second-order processes for high-purity photon pair generation in layer-poled thin-film lithium niobate** [13919-43]

SOURCES IV

- 13919 0K **Photonic crystal fibre cavities for quantum light generation** [13919-48]
- 13919 0L **Polarization-entangled photon pairs generated in aperiodically-poled KTP** [13919-49]
- 13919 0M **Imprinting of the dynamics of a single electron spin on a coherent state** [13919-50]

QUANTUM SIMULATIONS

- 13919 ON **A non-Markovian modeling of frequency upconversion via four-wave mixing schemes** [13919-51]
- 13919 OO **Learning with a single qubit: classical training of quantum-inspired classifiers for structured tasks** [13919-52]
- 13919 OP **Validation of quantum computing for transition metal oxide-based automotive catalysis** [13919-53]
- 13919 OQ **Simulation Ekert quantum key distribution protocol using Qiskit for verifying entanglement and security** [13919-54]
- 13919 OR **Empirical tight binding method for quantum mechanical approach of band structure computation** [13919-55]

QUANTUM COMMUNICATION AND SUPPORTING TECHNOLOGY II

- 13919 OS **Numerical analysis of single-photon phase noise via time-resolved two-photon interference** [13919-58]
- 13919 OT **Characterizing filter suppression requirements for entanglement distribution in quantum-classical optical systems** [13919-60]
- 13919 OU **Coexistence of quantum signals and long-haul white-rabbit transfers** [13919-61]
- 13919 OV **Regression models help track diamond nitrogen vacancy centers in real-time at ambient temperatures** [13919-62]

QUANTUM COMMUNICATION AND SUPPORTING TECHNOLOGY III

- 13919 OW **Monolithic ion trap integration of superconducting nanowire single-photon detectors and photonics for trapped-ion qubit state readout (Invited Paper)** [13919-63]
- 13919 OX **Photon–electron entanglement and synthetic time dilation in polarization-tuned metasurfaces** [13919-66]

QUANTUM COMPUTATION I

- 13919 OY **Impact of a free space optics switch on ebit fidelity for distributed quantum computing** [13919-68]
- 13919 OZ **A scalable PIC-based addressing unit for segmented quadrupole ion traps** [13919-69]

QUANTUM COMPUTATION II

- 13919 10 **Quantum-aware gradient descent for hybrid machine learning architectures** [13919-72]
- 13919 11 **Structured light with orbital angular momentum (OAM) for scalable quantum gate operations** [13919-73]
- 13919 12 **Integration and control of an LNOI interferometer for photonic quantum computing** [13919-70]

QUANTUM COMMUNICATION II

- 13919 13 **Modulator-free frequency-bin entanglement certification over multimode channels** [13919-82]

QUANTUM COMMUNICATIONS AND CRYPTOGRAPHY II

- 13919 14 **Time-bin encoded higher dimensional measurement device independent quantum key distribution** [13919-89]
- 13919 15 **Quantum authenticated communications** [13919-92]

POSTER SESSION

- 13919 16 **Quality-factor of tantalum resonators on 300mm silicon substrate** [13919-93]
- 13919 17 **Unsupervised quantum machine learning using one clean qubit** [13919-98]

DIGITAL POSTER SESSION

- 13919 18 **Integrated quantum signal generation, pump suppression, and photon demultiplexing** [13919-28]
