

PROCEEDINGS OF SPIE

International Symposium on Robotics and Artificial Intelligence (ISRAI 2025)

Hanxuan Zhang
Editor

14–16 November 2025
Changchun, China

Organized by
CUST School of Artificial Intelligence (China)

Sponsored by
Changchun University of Science and Technology (China)

Co-Sponsored by
Jilin Association for Artificial Intelligence (China)

Guided by
Jilin Association of Robot (China)

Published by
SPIE

Volume 14055

Proceedings of SPIE 0277-786X, V. 14055

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Symposium on Robotics and Artificial Intelligence (ISRAI 2025)*, edited by Hanxuan Zhang, Proc. of SPIE 14055, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

INTERNATIONAL SYMPOSIUM ON ROBOTICS AND ARTIFICIAL INTELLIGENCE (ISRAI 2025)

- 14055 02 **A fast global path planning method for mobile robots by ray casting** [14055-10]
- 14055 03 **Key technologies for UAV live installation of 10kV line interphase spacers in complex terrain**
[14055-6]
- 14055 04 **Edge-focused lightweight framework for real-time lane detection in driver assistance systems** [14055-21]
- 14055 05 **An adaptive fault detection framework based on graph attention network for locomotive diesel engines** [14055-8]
- 14055 06 **Indoor visible light positioning system based on local and non-local feature fusion network**
[14055-57]
- 14055 07 **Research on the off-road mobility of intelligent vehicles over soft terrain** [14055-22]
- 14055 08 **An object detection algorithm based on the combination of the improved YOLOv8 and Mamba models** [14055-5]
- 14055 09 **Simplified outer-envelope triangular mesh generation for STEP-format CAD models**
[14055-27]
- 14055 0A **Super-resolution of light field images based on hierarchical interactive learning** [14055-31]
- 14055 0B **Lightweight object detection network improved based on YOLOv8** [14055-38]
- 14055 0C **Construction of a hierarchical algorithm system for oil and gas pipeline inspection path planning under the vehicle-UAV collaborative inspection mode** [14055-1]
- 14055 0D **Parameter identification and compensation of LuGre model based on improved whale optimization algorithm** [14055-44]
- 14055 0E **Fusion strategy-based multiscale convolution and hybrid attention for image dehazing**
[14055-35]
- 14055 0F **Handwritten digit recognition based on channel and spatial attention mechanisms**
[14055-53]
- 14055 0G **RTLOCs: RGBT-LiDAR multimodal fusion for object detection of robot in outdoor** [14055-37]

- 14055 OH **Research on robotic arm control based on improved reward function and experience replay strategy in DDPG** [14055-2]
- 14055 OI **Segmentation-based PE-CRNN for text recognition in complex scenes** [14055-42]
- 14055 OJ **A robotic arm grasping method integrating fractional-order iterative sliding mode control and deep reinforcement learning** [14055-55]
- 14055 OK **Multirobot cooperative SLAM method based on adaptively weighted fusion of LiDAR and vision** [14055-26]
- 14055 OL **A closed-loop feedback framework based on large language models for iterative optimization in medical record generation** [14055-30]
- 14055 OM **Point cloud segmentation and object extraction in industrial indoor environments** [14055-12]
- 14055 ON **Research on the application and performance of a multifunctional robotic gripper in polishing and grinding of mold curved surfaces** [14055-50]
- 14055 OO **MSGC-NetVLAD: a lightweight visual place recognition neural network for autonomous robots** [14055-46]
- 14055 OP **Empirical study on attention-enhanced deep learning for multimodal big data fusion analysis** [14055-15]
- 14055 OQ **Application of extension control in industrial automation** [14055-9]
- 14055 OR **Spectral spatial transformer with spatio-temporal decoupled attention for rice fertilizer efficiency classification** [14055-48]
- 14055 OS **Multifeature fusion object tracking by radial basis function neural networks** [14055-23]
- 14055 OT **Design of deep learning-based intelligent path planning and collaborative fault diagnosis system for welding robots** [14055-7]
- 14055 OU **Research on training privacy-preserving medical image classification model based on federated learning** [14055-54]
- 14055 OV **Parcel-level classification of glutinous maize under UAV remote sensing: discriminating laser pretreatment differences** [14055-36]
- 14055 OW **Improved SVDD-based anomaly detection models** [14055-47]
- 14055 OX **Research and application of truss manipulator based on heavy load handling** [14055-24]
- 14055 OY **A semantic segmentation method for polarized multispectral images based on U-Net** [14055-61]

- 14055 0Z **SkySense-CCS: a ground-based cloud segmentation method using connected domain algorithm** [14055-45]
- 14055 10 **Application of deep learning-based object detection methods in aluminum labels production lines** [14055-18]
- 14055 11 **Enhanced YOLOv11n with EMA attention and SPDConv for blurred facial expression recognition** [14055-32]
- 14055 12 **Research on UAV airspace planning in emergency rescue based on multiagent cooperative decision-making** [14055-52]
- 14055 13 **Evaluation of multisensor odometry and SLAM free of ground truth** [14055-11]
- 14055 14 **Design of low-light image object detection algorithm based on improved YOLO model** [14055-33]
