

PROCEEDINGS OF SPIE

Third International Conference on UltrafastX 2025

Yuxi Fu
Wenhui Fan
Editors

23–26 October 2025
Xiamen, China

Hosted by

Xi'an Institute of Optics and Precision Mechanics, CAS (China) • Peking University (China)
Institute of Physics, CAS (China) • Xiamen University (China) • Shaanxi Optical Society (China)

Organized by

Ultrafast Science (China) • Acta Photonica Sinica (China) • iOptics (China) • National Key Laboratory of Ultrafast Optical Science and Technology (China) • Center for Attosecond Science and Technology (China) • Center for Ultrafast Physics, Institute of Physics, CAS (China) • Pen-Tung Sah Institute of Micro-Nano Science and Technology, Xiamen University (China) • Fujian Optical Society (China)

Co-organized by

Xi'an Institute of Optics and Precision Mechanics Investment Holdings Co., Ltd. (China) • Key Laboratory of Ultrafast Photoelectric Diagnostics Technology, CAS (China) • Youth Innovation Promotion Association Group of XIOPM, CAS (China) • Attosecond Science Center, Songshan Lake Materials Laboratory (China) • Opto-Electronic Advances (China)

Volume 14067

Proceedings of SPIE 0277-786X, V. 14067

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on UltrafastX 2025*, edited by Yuxi Fu, Wenhui Fan, Proc. of SPIE 14067, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

ATTOSECOND SCIENCE AND TECHNOLOGY

14067 02 **Study of sub-picosecond electron microbunch generation based on harmonic generation**
[14067-4]

ULTRAFAST IMAGING AND SPECTROSCOPY

14067 03 **Physics-informed reconstruction of 3D shock-wave velocity fields from compressed
ultrafast imagery** [14067-7]

14067 04 **A high-repetition-rate broadband optical parametric amplifier with prism-based pulse-front
tilt compensation** [14067-14]

ULTRAFAST PHENOMENA AND DYNAMICS

14067 05 **Multistable soliton collisions in an optical microresonator** [14067-6]

ULTRAFAST PARTICLE SCIENCE, TECHNOLOGY, AND APPLICATIONS

14067 06 **Comparative dark-current performance of 1.4-cell and 1.6-cell photocathode RF guns for
MeV-UED** [14067-8]

ULTRAFAST LASER PROCESSING AND MANUFACTURING

14067 07 **Characterizing focusing properties during ultrafast laser ablation based on acoustic
emission technology** [14067-1]

PHD STUDENT SPECIAL

14067 08 **Generation of deep-sub-cycle optical pulses via inverse Compton scattering in a mid-
infrared laser field** [14067-3]

14067 09 **Pulse quality refinement enabled by programmable spectral shaping in high-power
ultrafast fiber laser** [14067-11]
