

PROCEEDINGS OF SPIE

Fifth International Conference on Frontiers of Electrical Power and Energy Systems (EPES 2025)

Shahid Hussain
Jung-Chang Wang
Lobna A. Said
Editors

20–21 December 2025
Hohhot, China

Organized by
Inner Mongolia University of Technology (China)
Northeastern University (China)

Sponsored by
Southwest Jiaotong University (China)
Fudan University (China)
University of Padova (Italy)
Sungkyunkwan University (Korea, Republic of)

Published by
SPIE

Volume 14118

Proceedings of SPIE 0277-786X, V. 14118

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fifth International Conference on Frontiers of Electrical Power and Energy Systems (EPES 2025)*, edited by Shahid Hussain, Jung-Chang Wang, Lobna A. Said, Proc. of SPIE 14118, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

- vii *Conference Committee*
- ix *Introduction*

ELECTRICAL POWER AND ENERGY ENGINEERING

- 14118 02 **Numerical study on thermal management of battery modules subjected to different pinning depths using CPCM** [14118-2]
- 14118 03 **Research on partial discharge test of converter transformer for BorWin6 project offshore station** [14118-30]
- 14118 04 **Research on vibration control method of capacitor core based on loaded metal rubber shock absorber** [14118-42]
- 14118 05 **A charging pile anomaly detection method based on isolation forest and principal component analysis** [14118-48]
- 14118 06 **Numerical weather prediction-aided photovoltaic power plant power output forecasting scheme** [14118-1]
- 14118 07 **Research on the standard system for electric heavy swappable-duty trucks based on the unified architecture framework (UAF)** [14118-38]
- 14118 08 **Research on online comparison and measurement technology for the metering performance of networked power meters** [14118-12]
- 14118 09 **Analysis and research on optimization technology of steam turbine cold end system** [14118-9]
- 14118 0A **Design and operational procedures of a drone-mounted mechanism for insulating and live-spraying distribution network equipment** [14118-13]
- 14118 0B **Control system design and field application verification of single-phase grounding device in substation** [14118-31]
- 14118 0C **A variable speed governing droop setting method based on the real-time operating status of thermal power unit** [14118-14]
- 14118 0D **MeterPrompt: a lightweight diagnostic framework using dynamic prompts for electricity meter calibration: case studies on electric meter calibration faults** [14118-29]
- 14118 0E **Lightweight surface defect detection for substation equipment based on YOLOv7** [14118-28]
- 14118 0F **Implementation of carbon measurement technology across the entire power system in Ningxia region** [14118-39]

- 14118 OG **Research on carbon footprint of power batteries for new energy vehicles based on trusted data space technology** [14118-52]
- 14118 OH **Adaptive differential protection scheme for distribution network with distributed power sources** [14118-33]
- 14118 OI **Photovoltaic power data preprocessing and law analysis based on sky state stratification and time delay correction** [14118-24]
- 14118 OJ **Performance comparison between straight-type cold plate and streamlined cold plate for energy storage battery** [14118-51]
- 14118 OK **Research on autonomous strategy for full-factor balance at the distribution station area side towards high-proportion wind and solar grid integration** [14118-23]
- 14118 OL **Exploration research on new energy vehicle charging and energy supplement technology based on trusted data space technology** [14118-50]
- 14118 OM **Research on impact resistance of materials for lattice crossing frame in transmission lines** [14118-35]
- 14118 ON **Assessment and optimization of battery life for DC power supply in substations through recombination technology and its application** [14118-36]
- 14118 OO **Research on technologies of big data fusion-driven vehicle-grid interaction based on trusted data space** [14118-46]
- 14118 OP **Performance study of a tapered inlet cold plate for energy storage battery** [14118-56]

ELECTRONIC TECHNOLOGY AND AUTOMATION

- 14118 OQ **Design method of LLC soft switch based on dead zone analysis** [14118-19]
- 14118 OR **Design and implementation of automatic anti-collision alarm system for automobiles** [14118-55]
- 14118 OS **A digital control unit for electro-hydraulic servo valves featuring high-precision control and integrated LVDT digital demodulation** [14118-37]
- 14118 OT **Design and implementation of anti-slip mechanical grips based on negative pressure adsorption and hydraulic assistance** [14118-44]
- 14118 OU **Design of an anti-fall rail assisted climbing and inspection system** [14118-47]
- 14118 OV **High-altitude airship flight simulation modeling and analysis** [14118-15]

14118 0W **Research and design of intelligent capping machine based on servo drive and torque monitoring** [14118-45]

COMPUTER SCIENCE AND APPLICATIONS

14118 0X **Machine-learning-based vehicle fault prediction algorithm** [14118-21]

14118 0Y **Multi-unmanned ground vehicle ground path planning based on the improved CBS algorithm** [14118-20]

14118 0Z **Three-dimensional gaze estimation with fusion of head-eye movement features** [14118-4]

14118 10 **Document-level causal relationship extraction based on CGCN and BERT** [14118-10]

14118 11 **Vulnerability analysis and attack detection for open-source software in 5G O-RAN systems** [14118-49]

14118 12 **Research on the application of data of new energy vehicles in battery material based on trusted data space** [14118-53]

14118 13 **Comprehensive electronic map system for urban rail transit lines based on unified mileage** [14118-3]

14118 14 **The game behavior of traffic participants based on real-time information inducement** [14118-7]

14118 15 **Advances on data center multilevel thermal performance assessment in AI era** [14118-41]

ENGINEERING APPLICATION AND TECHNOLOGY

14118 16 **A calculation method for dual traction cables of tethered balloon in transportation** [14118-40]

14118 17 **Analysis of the causes of tubing corrosion in shale gas wells and research on countermeasures** [14118-43]

14118 18 **Simulation analysis of wind load on tethered balloons for material transportation in mountainous areas** [14118-54]
